DOMESTIC WASTEWATER

The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.

City of Gatesville (CN600702663) operates Stillhouse Branch Wastewater Treatment Facility RN101020068. a facility which incorporates screening, oxidation ditches, clarification, chlorine injection, and aeration. The facility is located 402 Stillhouse Rd, in Gatesville, Coryell County, Texas 76528.

Renewal of Discharge Permit

Discharges from the facility are expected to contain nitrogen and phosphorus. Agriculture waste will be treated by screens to remove large solids, then move into an oxidation ditch to promote the decrease in biological oxygen demand (BOD). Remaining solids are then separated via final clarifiers, then water is disinfected using chlorine injection. Before the effluent pump station, the water is aerated then discharged.
