

## Section 15. Plain Language Summary (Instructions Page 40)

If you are subject to the alternative language notice requirements in [30 Texas Administrative Code §39.426](#), **you must provide a translated copy of the completed plain language summary in the appropriate alternative language as part of your application package.** For your convenience, a Spanish template has been provided below.

### **ENGLISH TEMPLATE FOR TPDES or TLAP NEW/RENEWAL/AMENDMENT APPLICATIONS**

#### **DOMESTIC WASTEWATER**

*The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.*

City of Sugar Land (CN600593990 ) operates City of Sugar Land South Wastewater Treatment Plant RN 102915626. a conventional activated sludge wastewater treatment plant with an annual average discharge not to exceed 7.500 million gallons per day. The facility is located at 4802 Scenic River Drive, in Sugar Land, Fort Bend County, Texas 77479.

The City of Sugar Land is applying to renew an existing Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0012833002.

Discharges from the facility are expected to contain five-day carbonaceous biochemical oxygen demand (CBOD<sub>5</sub>), total suspended solids (TSS), ammonia nitrogen (NH<sub>3</sub>-N) and *Escherichia coli*. Additional potential pollutants are included in the Domestic Technical Report 1.0, Section 7. Pollutant Analysis of Treated Effluent and Domestic Worksheet 4.0 in the permit application package. Domestic wastewater is treated by a conventional activated sludge process and the treatment units include a bar screen, grit removal, aeration basins, final clarifiers, sludge digesters, filter belt press, chlorine contact chambers and dechlorination chamber.
