

## Plain Language Summary Template and Instructions for Texas Pollutant Discharge Elimination System (TPDES) and Texas Land Application (TLAP) Permit Applications

This template is a guide to assist applicant's in developing a plain language summary as required by 30 Texas Administrative Code Chapter 39 Subchapter H. Applicant's may modify the template as necessary to accurately describe their facility as long as the summary includes the following information: (1) the function of the proposed plant or facility; (2) the expected output of the proposed plant or facility; (3) the expected pollutants that may be emitted or discharged by the proposed plant or facility; and (4) how the applicant will control those pollutants, so that the proposed plant will not have an adverse impact on human health or the environment.

Fill in the blanks below to describe your facility and application in plain language. Instructions and examples are provided below. Make any other edits necessary to improve readability or grammar and to comply with the rule requirements.

If you are subject to the alternative language notice requirements in 30 Texas Administrative Code §39.426, **you must provide a translated copy of the completed plain language summary in the appropriate alternative language as part of your application package**. For your convenience, a Spanish template has been provided below.

### ENGLISH TEMPLATE FOR TPDES or TLAP NEW/RENEWAL/AMENDMENT APPLICATIONS

#### INDUSTRIAL WASTEWATER/STORMWATER

*The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.*

Martin Marietta Materials Southwest, LLC (CN600125157) operates Tin Top Quarry 4, RN110829454, a sand and gravel quarry. The facility is located at 7205 Bethel Road, in Weatherford, Parker County, Texas 76087. Martin Marietta Materials Southwest proposes the addition of approximately 40.25 acres to the north and 83.6 acres to the south of the existing permitted property. Martin Marietta Materials Southwest also proposes the addition of a second stormwater outfall which will be located at the southwestern corner of the entire site property boundary. Martin Marietta Materials Southwest, LLC recognizes that this addition has the potential to result in additional stormwater discharges to downstream water bodies via the existing permitted stormwater outfall and the additional proposed stormwater outfall.

This permit will not authorize a discharge of pollutants into water in the state.

Discharges from the facility are expected to contain sediments and may potentially contain VOC pollutants.
