

Plain Language Summary Template and Instructions for Texas Pollutant Discharge Elimination System (TPDES) and Texas Land Application (TLAP) Permit Applications

This template is a guide to assist applicant's in developing a plain language summary as required by [30 Texas Administrative Code Chapter 39 Subchapter H](#). Applicant's may modify the template as necessary to accurately describe their facility as long as the summary includes the following information: (1) the function of the proposed plant or facility; (2) the expected output of the proposed plant or facility; (3) the expected pollutants that may be emitted or discharged by the proposed plant or facility; and (4) how the applicant will control those pollutants, so that the proposed plant will not have an adverse impact on human health or the environment.

Fill in the blanks below to describe your facility and application. Instructions and examples are provided below. Make any other edits necessary to improve readability or grammar and to comply with the rule requirements.

If you are subject to the alternative language notice requirements in [30 Texas Administrative Code §39.426](#), **you must provide a translated copy of the completed plain language summary in the appropriate alternative language as part of your application package.** For your convenience, a Spanish template has been provided below.

ENGLISH TEMPLATE FOR TPDES or TLAP NEW/RENEWAL/AMENDMENT APPLICATIONS

DOMESTIC WASTEWATER

The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.

NTS Development Group, LLC (CN606082840) proposes to operate National Truck Stop RN102380474. a Gasoline Service Station. The facility will be located 15481 FM 968 West, in Longview, Texas, Harrison County, Texas 75602.

NTS Development Group has applied to the Texas Commission on Environmental Quality for proposed Texas Pollutant Discharge Elimination System, to authorize the discharge of treated wastewater at a volume not to exceed a daily average flow of 20,000 gallons per day. The discharge route will be from the plant site to a culvert; thence to an unnamed tributary of Mason Creek; thence to Mason Creek; then to Sabine River Above Toledo Bend Reservoir.

Discharges from the facility are expected to contain Restrooms, sinks and kitchen waste,.domestic wastewater will be treated by *A domestic wastewater treatment facility.*
