Fill in the highlighted areas below to describe your facility and application in plain language. Instructions and examples are provided below. Make any other edits necessary to improve readability or grammar and to comply with the rule requirements. After filling in the information for your facility delete these instructions.

If you are subject to the alternative language notice requirements in 30 TAC Section 39.426, **you must provide a translated copy of the completed plain language summary in the appropriate alternative language as part of your application package**. TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN WATER QUALITY PERMIT RENEWAL

PERMIT NO. WQ0010268002

APPLICATION. City of San Augustine, 301 South Harrison Street, San Augustine, Texas 75972, has applied to the Texas Commission on Environmental Quality (TCEQ) to renew Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0010268002 (EPA I.D. No. TX0122351) to authorize the discharge of treated wastewater at a volume not to exceed a daily average flow of 95,000 gallons per day. The water treatment facility is located approximately 1,089 feet south of the intersection of County Road 400 and Farm-to-Market Road 2213, near the city of San Augustine, in San Augustine County, Texas 75972. The discharge route is from the plant site to City Lake; thence to Carrizo Creek; thence to Ayish Bayou; thence to Sam Rayburn Reservoir. TCEQ received this application on October 17, 2025. The permit application will be available for viewing and copying at San Augustine City Hall, Front Desk, 301 South Harrison Street, San Augustine, in San Augustine County, Texas prior to the date this notice is published in the newspaper. The application is available for viewing and copying at the following webpage: https://www.tceq.texas.gov/permitting/wastewater/pending-permits/tpdes-applications. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For the exact location, refer to the application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.1075,31.509722&level=18

ADDITIONAL NOTICE. TCEQ's Executive Director has determined the application is administratively complete and will conduct a technical review of the application. After technical review of the application is complete, the Executive Director may prepare a draft permit and will issue a preliminary decision on the application. **Notice of the Application and Preliminary Decision will be published and mailed to those who are on the county-wide mailing list and to those who are on the mailing list for this application. That notice will contain the deadline for submitting public comments.**

PUBLIC COMMENT / PUBLIC MEETING. You may submit public comments or request a public meeting on this application. The purpose of a public meeting is to provide the opportunity to submit comments or to ask questions about the application. TCEQ will hold a public meeting if the Executive Director determines that there is a significant degree of public interest in the application or if requested by a local legislator. A public meeting is not a contested case hearing.

OPPORTUNITY FOR A CONTESTED CASE HEARING. After the deadline for submitting public comments, the Executive Director will consider all timely comments and prepare a response to all relevant and material, or significant public comments. **Unless the application is directly referred for a contested case hearing, the response to comments, and the Executive Director's decision on the application, will be mailed to everyone who submitted public comments and to those persons who are on the mailing list for this application. If comments are received, the mailing will also provide instructions for requesting reconsideration of the Executive Director's decision and for requesting a contested case hearing.** A contested case hearing is a legal proceeding similar to a civil trial in state district court.

TO REQUEST A CONTESTED CASE HEARING, YOU MUST INCLUDE THE FOLLOWING ITEMS IN YOUR REQUEST: your name, address, phone number; applicant's name and proposed permit number; the location and distance of your property/activities relative to the proposed facility; a specific description of how you would be adversely affected by the facility in a way not common to the general public; a list of all disputed issues of fact that you submit during the comment period and, the statement "[I/we] request a contested case hearing." If the request for contested case hearing is filed on behalf of a group or association, the request must designate the group's representative for receiving future correspondence; identify by name and physical address an individual member of the group who would be adversely affected by the proposed facility or activity; provide the information discussed above regarding the affected member's location and distance from the facility or activity; explain how and why the member would be affected; and explain how the interests the group seeks to protect are relevant to the group's purpose.

Following the close of all applicable comment and request periods, the Executive Director will forward the application and any requests for reconsideration or for a contested case hearing to the TCEQ Commissioners for their consideration at a scheduled Commission meeting.

The Commission may only grant a request for a contested case hearing on issues the requestor submitted in their timely comments that were not subsequently withdrawn. **If a hearing is granted, the subject of a hearing will be limited to disputed issues of fact or mixed questions of fact and law relating to relevant and material water quality concerns submitted during the comment period.**

TCEQ may act on an application to renew a permit for discharge of wastewater without providing an opportunity for a contested case hearing if certain criteria are met.

MAILING LIST. If you submit public comments, a request for a contested case hearing or a reconsideration of the Executive Director's decision, you will be added to the mailing list for this specific application to receive future public notices mailed by the Office of the Chief Clerk. In addition, you may request to be placed on: (1) the permanent mailing list for a specific applicant name and permit number; and/or (2) the mailing list for a specific county. If you wish to be placed on the permanent and/or the county mailing list, clearly specify which list(s) and send your request to TCEQ Office of the Chief Clerk at the address below.

INFORMATION AVAILABLE ONLINE. For details about the status of the application, visit the Commissioners' Integrated Database at www.tceq.texas.gov/goto/cid. Search the database using the permit number for this application, which is provided at the top of this notice.

SUMMARY OF APPLICATION IN PLAIN LANGUAGE FOR TPDES OR TLAP PERMIT APPLICATIONS

Summary of Application (in plain language) Template and Instructions for Texas Pollutant Discharge Elimination System (TPDES) and Texas Land Application (TLAP) Permit Applications

Applicants should use this template to develop a plain language summary of your facility and application as required by Title 30, Texas Administrative Code (30 TAC), Chapter 39, Subchapter H. You may modify the template as necessary to accurately describe your facility as long as the summary includes the following information: (1) the function of the proposed plant or facility; (2) the expected output of the proposed plant or facility; (3) the expected pollutants that may be emitted or discharged by the proposed plant or facility; and (4) how you will control those pollutants, so that the proposed plant will not have an adverse impact on human health or the environment.

Fill in the highlighted areas below to describe your facility and application in plain language. Instructions and examples are provided below. Make any other edits necessary to improve readability or grammar and to comply with the rule requirements. After filling in the information for your facility delete these instructions.

If you are subject to the alternative language notice requirements in 30 TAC Section 39.426, **you must provide a translated copy of the completed plain language summary in the appropriate alternative language as part of your application package**. For your convenience, a Spanish template has been provided below.

City of San Augustine
Water Treatment Plant Sludge Lagoon

Designed by Main Rady, and Associates prior to 1975 with other modifications to the City of San Augustine Water plant. The sludge lagoon was a necessary improvement due to the waste produced by the backwashing of the filters during normal treatment of the surface water.
The sludge lagoon is designed to hold approximately 3.5 million gallons at capacity. The sludge lagoon perimeter is approximately 1,068.0 feet which is approximately 1.70 acres in size. The capacity of the lagoon is approximately 10.741 acre feet or approximately 467,881.95 cubic feet.
The sludge lagoon is lined with a HDPE clay liner in accordance with the design requirements from 1975. No modifications have been made to the sludge lagoon since its construction.

Today, in 2025 the lagoon is used for temporary storage for the backwash water of the water plant filters. The operator wastes to the lagoon during the backwashing of the water plant filter units, the sludge is taken from the lagoon via a pump truck where it is then either land applied at a permitted application site or sent directly to a permitted landfill.

Please see plans sheets and cross sections attachment for other details on the sludge lagoon.

Water Treatment Plant Sludge Lagoon
Infiltration of Groundwater

Groundwater in and around the sludge lagoon is kept from infiltrating by the compacted clay liner installed during construction of the sludge lagoon prior to 1975.
The liner system has containment elements constructed under the waste to control infiltration of contaminated liquids into the subsoil or groundwater. The contaminated liquid, or leachate, may be part of the waste itself or may originate from water that has infiltrated into the waste.
The liner system consists of single primary layer which fulfill specific functions.
The liner has a high tensile strength, flexibility, and elongation without failure. The liner resists abrasion, puncture, and chemical degradation by leachate. Lastly, the liner can withstand temperature variations.
Secondary containment is a french drain system that was installed under the lagoon. It was installed to collect any leachate from below the liner. The french drain allows any groundwater to travel from under the lagoon as to not cause any unnecessary ponding which could cause movement of the soils under the lagoon or cause infiltration.

Nuisance Controls

Definition

The definition of "Nuisance" can include anything which is injurious to human health or is indecent or offensive to the senses, interferes with the comfortable enjoyment of life or property and affects at the same time an entire community, neighborhood, household or any considerable number of persons, although the extent of annoyance or damage inflicted upon an individual may be unequal, and which occurs as a result of the storage, removal, transport, processing and/or disposal of water plant waste."

There are factors to consider when avoiding or controlling possible nuisances with the lagoon at San Augustine Water Treatment Plant. One of the first would be odor control. The lagoon is an outdoor, uncovered, 3.5 million gallon capacity lagoon in San Augustine County, Texas. The weather can be an issue. The operators pay special attention to the lagoon in times of excessive heat to avoid any odor issues. The filter backwash waste in the lagoon will always need to be kept moving and "healthy" to avoid odor issues. Odor quickly becomes a problem when waste heats up or wind changes direction and odor molecules waft to surrounding areas. Compliance with nuisance odor abatement is a daily issue. Operators and managers find that utilizing an ongoing mitigation plan is the best course of action and provides a standardized, consistent record of compliance that benefit the facility.

Essentially, the Sludge lagoon shall be operated and maintained so as not to create a public nuisance. This is usually accomplished through the development and incorporation of an odor management plan into the facility operating record. Compliance is achieved through the lack of citizen complaints and agency inspections, based on the policy and procedures.

Ms. Francesca,
Just a question.
Since this is water treatment plant effluent should the description say “treated filter backwash wastewater” or just wastewater? I have had them both written ways, but I did want to ask.

Everything else is correct and I have verified that San Augustine City Hall is open during business hours for copying and viewing of the permit.
