*The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 TAC Chapter 39. The information provided in this summary may change during the technical review of the application and is not a federal enforceable representation of the permit application.*

The City of Luling (CN600243240) operates the City of Luling North Wastewater Treatment Plant (RN101610798), a municipal domestic wastewater treatment facility. The facility is located at 1001 Willow Street, in Luling, Caldwell County, Texas 78648. This application is for renewal of an existing TPDES discharge permit.

Discharges from the facility are expected to contain biochemical oxygen demand, suspended solids, and ammonia nitrogen. Municipal domestic wastewater is treated by an activated sludge treatment process consisting of grit removal, primary aeration, secondary aeration, clarification, a trickling filter, and a chlorine contact basin. Wasted sludge is sent to a digester for further processing and finally a sludge drying bed for dewatering prior to being trucked by a third-party entity to a landfill for disposal.

## NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN WATER QUALITY PERMIT RENEWAL

PERMIT NO. WQ0010582002

**APPLICATION.** City of Luling, 509 East Street Luling, Texas 78648, has applied to the Texas Commission on Environmental Quality (TCEQ) to renew Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0010582002 (EPA I.D. No. TX0022764) to authorize the discharge of treated wastewater at a volume not to exceed a daily average flow of 900,000 gallons per day. The domestic wastewater treatment facility is located at 1001 Willow Street, in the city of Luling, in Caldwell County, Texas 78648. The discharge route is from the plant site to Salt Branch; thence to Plum Creek. TCEQ received this application on September 23, 2024. The permit application will be available for viewing and copying at Luling City Hall, 509 East Crockett, Luling, in Caldwell County, Texas prior to the date this notice is published in the newspaper. The application, including any updates, and associated notices are available electronically at the following webpage:

<https://www.tceq.texas.gov/permitting/wastewater/pending-permits/tpdes-applications>. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For the exact location, refer to the application.

<https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.629166,29.6875&level=18>

**ADDITIONAL NOTICE.** TCEQ's Executive Director has determined the application is administratively complete and will conduct a technical review of the application. After technical review of the application is complete, the Executive Director may prepare a draft permit and will issue a preliminary decision on the application. **Notice of the Application and Preliminary Decision will be published and mailed to those who are on the county-wide mailing list and to those who are on the mailing list for this application. That notice will contain the deadline for submitting public comments.**

**PUBLIC COMMENT / PUBLIC MEETING.** You may submit public comments or request a public meeting on this application. The purpose of a public meeting is to provide the opportunity to submit comments or to ask questions about the application. TCEQ will hold a public meeting if the Executive Director determines that there is a significant degree of public interest in the application or if requested by a local legislator. A public meeting is not a contested case hearing.

**OPPORTUNITY FOR A CONTESTED CASE HEARING.** After the deadline for submitting public comments, the Executive Director will consider all timely comments and prepare a response to all relevant and material, or significant public comments. **Unless the application**

is directly referred for a contested case hearing, the response to comments, and the Executive Director's decision on the application, will be mailed to everyone who submitted public comments and to those persons who are on the mailing list for this application. If comments are received, the mailing will also provide instructions for requesting reconsideration of the Executive Director's decision and for requesting a contested case hearing. A contested case hearing is a legal proceeding similar to a civil trial in state district court.

**TO REQUEST A CONTESTED CASE HEARING, YOU MUST INCLUDE THE FOLLOWING ITEMS IN YOUR REQUEST:** your name, address, phone number; applicant's name and proposed permit number; the location and distance of your property/activities relative to the proposed facility; a specific description of how you would be adversely affected by the facility in a way not common to the general public; a list of all disputed issues of fact that you submit during the comment period and, the statement "[I/we] request a contested case hearing." If the request for contested case hearing is filed on behalf of a group or association, the request must designate the group's representative for receiving future correspondence; identify by name and physical address an individual member of the group who would be adversely affected by the proposed facility or activity; provide the information discussed above regarding the affected member's location and distance from the facility or activity; explain how and why the member would be affected; and explain how the interests the group seeks to protect are relevant to the group's purpose.

Following the close of all applicable comment and request periods, the Executive Director will forward the application and any requests for reconsideration or for a contested case hearing to the TCEQ Commissioners for their consideration at a scheduled Commission meeting.

The Commission may only grant a request for a contested case hearing on issues the requestor submitted in their timely comments that were not subsequently withdrawn. **If a hearing is granted, the subject of a hearing will be limited to disputed issues of fact or mixed questions of fact and law relating to relevant and material water quality concerns submitted during the comment period.**

**TCEQ may act on an application to renew a permit for discharge of wastewater without providing an opportunity for a contested case hearing if certain criteria are met.**

**MAILING LIST.** If you submit public comments, a request for a contested case hearing or a reconsideration of the Executive Director's decision, you will be added to the mailing list for this specific application to receive future public notices mailed by the Office of the Chief Clerk. In addition, you may request to be placed on: (1) the permanent mailing list for a specific applicant name and permit number; and/or (2) the mailing list for a specific county. If you wish to be placed on the permanent and/or the county mailing list, clearly specify which list(s) and send your request to TCEQ Office of the Chief Clerk at the address below.

**INFORMATION AVAILABLE ONLINE.** For details about the status of the application, visit the Commissioners' Integrated Database at [www.tceq.texas.gov/goto/cid](http://www.tceq.texas.gov/goto/cid). Search the database using the permit number for this application, which is provided at the top of this notice.

**AGENCY CONTACTS AND INFORMATION.** All public comments and requests must be submitted either electronically at <https://www14.tceq.texas.gov/epic/eComment/>, or in writing to the Texas Commission on Environmental Quality, Office of the Chief Clerk, MC-105,

### PLAIN LANGUAGE SUMMARY FOR TPDES OR TLAP PERMIT APPLICATIONS

#### Plain Language Summary Template and Instructions for Texas Pollutant Discharge Elimination System (TPDES) and Texas Land Application (TLAP) Permit Applications

##### **ENGLISH TEMPLATE FOR TPDES or TLAP NEW/RENEWAL/AMENDMENT APPLICATIONS DOMESTIC WASTEWATER/STORMWATER**

*The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 TAC Chapter 39. The information provided in this summary may change during the technical review of the application and is not a federal enforceable representation of the permit application.*

The City of Luling (CN600243240) operates the City of Luling North Wastewater Treatment Plant (RN101610798), a municipal domestic wastewater treatment facility. The facility is located at 1001 Willow Street, in Luling, Caldwell County, Texas 78648. This application is for renewal of an existing TPDES discharge permit.

Discharges from the facility are expected to contain biochemical oxygen demand, suspended solids, and ammonia nitrogen. Municipal domestic wastewater is treated by an activated sludge treatment process consisting of grit removal, primary aeration, secondary aeration, clarification, a trickling filter, and a chlorine contact basin. Wasted sludge is sent to a digester for further processing and finally a sludge drying bed for dewatering prior to being trucked by a third-party entity to a landfill for disposal.

**DESCRIPTION OF THE TREATMENT PROCESS**

The City of Luling North Wastewater Treatment Plant is a conventional activated sludge municipal wastewater treatment facility utilizing a bullseye-style package plant for secondary treatment. The treatment plant is also equipped with final clarification and return sludge capabilities.

Raw sewage from the collection system enters the plant and flows through a manual bar screen before entering a grit chamber and pre-aeration basin. The screenings from the bar screen and grit chamber are collected and disposed of in a safe and legal manner. After the coarse debris is removed, the wastewater flows to the bullseye package plant for secondary aeration and contact stabilization. The sewage is aerated by coarse bubble diffusers via a set of dedicated blowers for the basin.

After secondary aeration, the mixed liquor flows to the final clarifier where the sludge settles to the bottom of the basin. The settled effluents flows over weirs at the top of the basins and is discharged to a trickling filter and then to the chlorine contact chamber for disinfection. As the effluent flows to the chlorine contact chamber, a chlorine solution is injected into the effluent. The effluent is retained in the chamber for a minimum of 20 minutes. Following disinfection, the effluent flow is measured and then discharged through a pipe into Salt Branch.

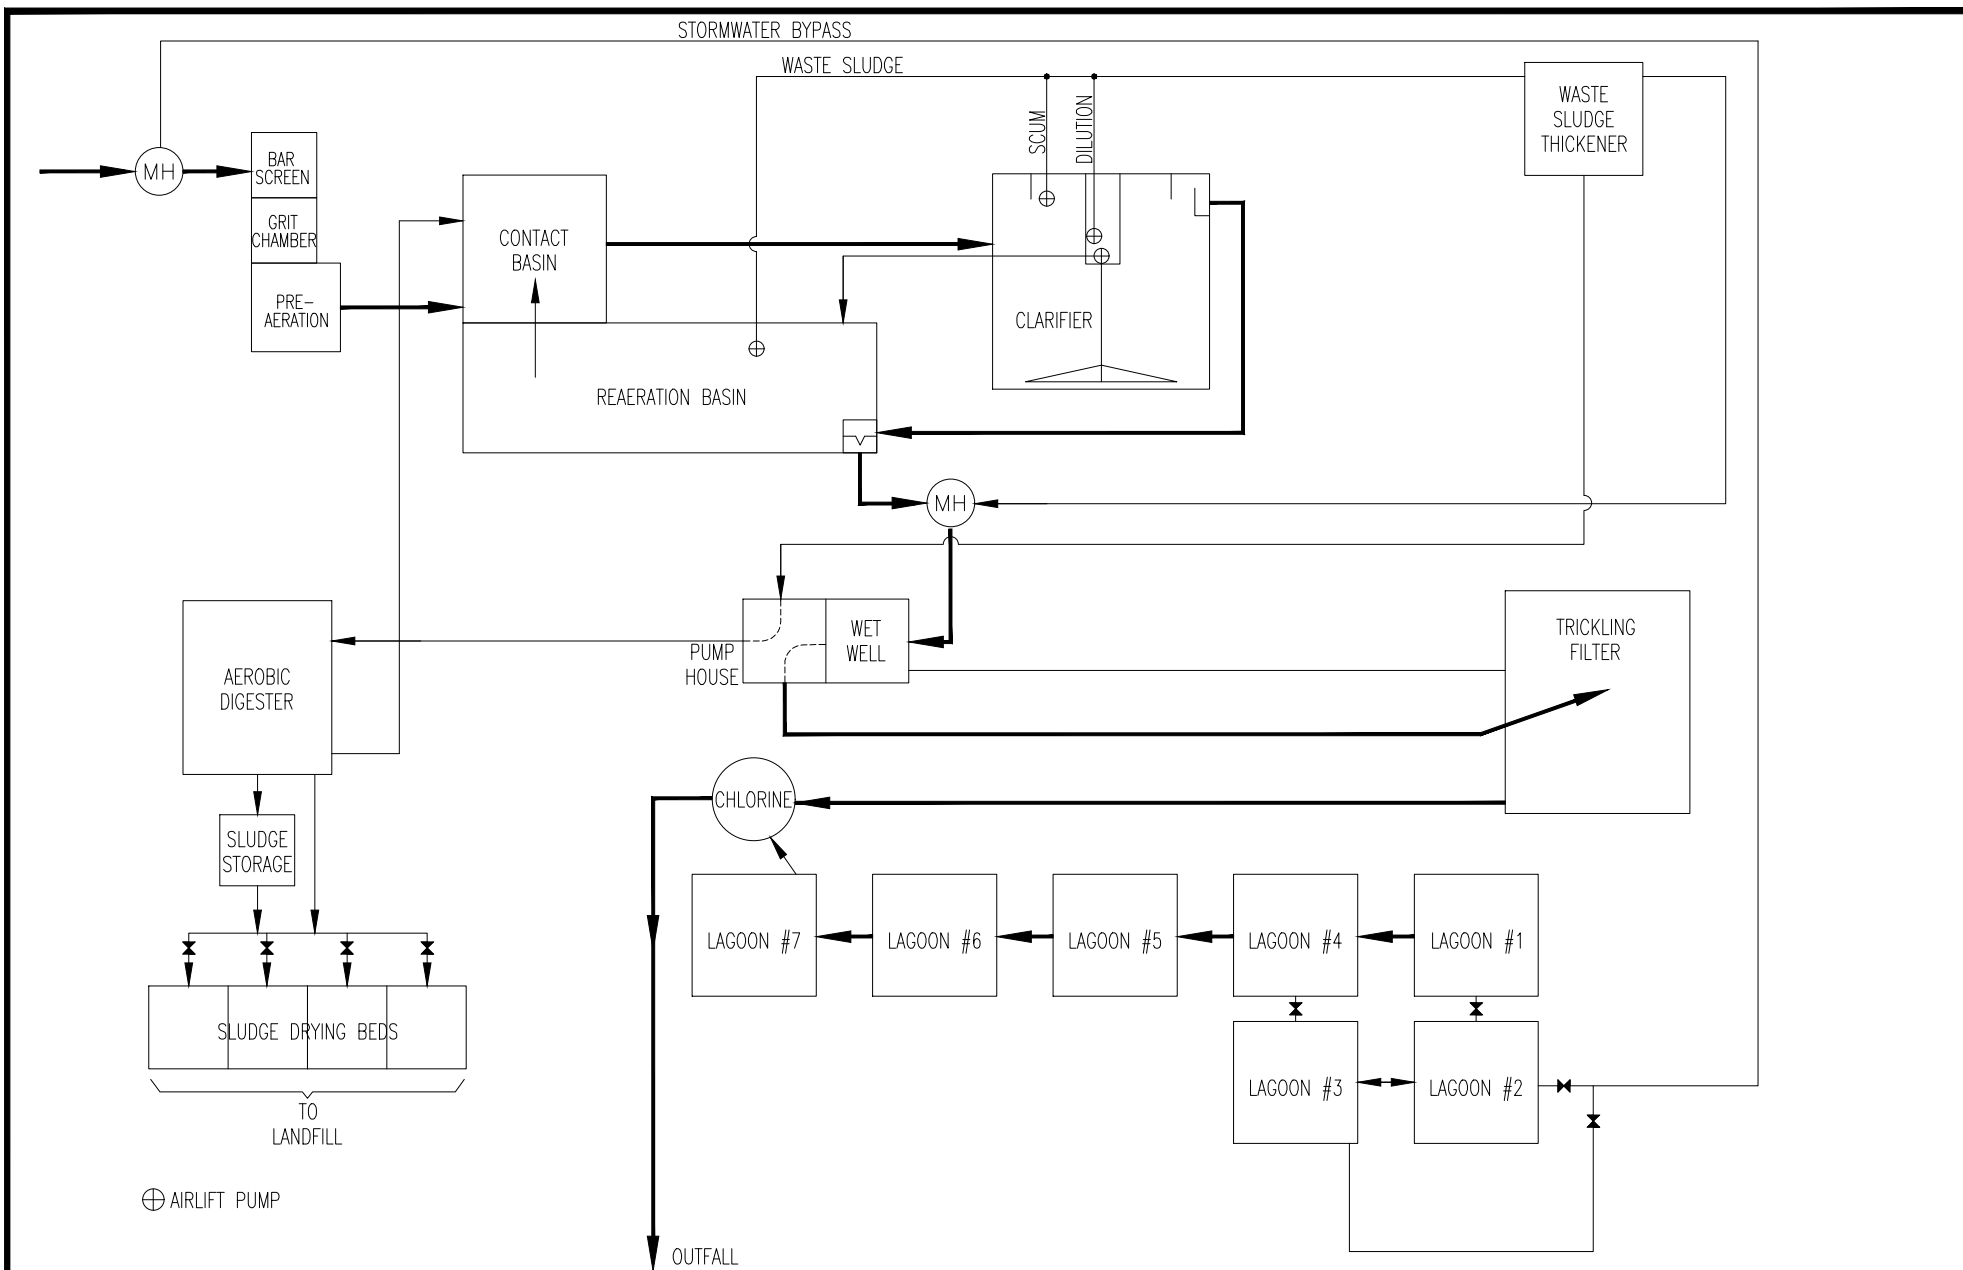

The settled sludge is collected from the bottom of the clarifiers and either returned to the secondary aeration basin for mixing or wasted to a digester before being sent to sludge drying beds. Once the sludge reaches a semi-solid state, it is transported via permitted hauler for disposal at a registered landfill.

The wastewater treatment plant also contains a system of 7 lagoons which are used during rain events and other peak flow scenarios to reduce the maximum peak flow discharge of the facility. In the event that flow is diverted to the lagoon system, it flows through a minimum of 6 lagoon units in series before being sent to the chlorine contact chamber for disinfection prior to being discharged.
