WORKSHEET 1.2

NOTICE. “THE MARSHALL CRITERIA”

This worksheet assists the Commission in determining notice required for certain **amendments** that do not already have a specific notice requirement in a rule for that type of amendment, and *that do not change the amount of water to be taken or the diversion rate*. The worksheet provides information that Applicant **is required** to submit for amendments such as certain amendments to special conditions or changes to off-channel storage. These criteria address whether the proposed amendment will impact other water right holders or the on- stream environment beyond and irrespective of the fact that the water right can be used to its full authorized amount.

*This worksheet is **not required** for Applications in the Rio Grande Basin requesting changes in the purpose of use, rate of diversion, point of diversion, and place of use for water rights held in and transferred within and between the mainstems of the Lower Rio Grande, Middle Rio Grande, and Amistad Reservoir. See 30 TAC § 303.42.*

*This worksheet is **not required** for amendments which are only changing or adding diversion points, or request only a bed and banks authorization or an IBT authorization. However, Applicants may wish to submit the Marshall Criteria to ensure that the administrative record includes information supporting each of these criteria*

1. The “Marshall Criteria” (Instructions, Page. 21)

Submit responses on a supplemental attachment titled “Marshall Criteria” in a manner that conforms to the paragraphs (a) – (g) below:

- a. Administrative Requirements and Fees. An amendment application should include, but is not limited to, a sworn application, maps, completed conservation plan, fees, etc.
- b. Beneficial Use. Discuss how proposed amendment is a beneficial use of the water as defined in TWC § 11.002 and listed in TWC § 11.023. Identify the specific proposed use of the water (e.g., road construction, hydrostatic testing, etc.) for which the amendment is requested.
- c. Public Welfare. Explain how proposed amendment is not detrimental to the public welfare. Consider any public welfare matters that might be relevant to a decision on the application. Examples could include concerns related to the well-being of humans and the environment.
- d. Groundwater Effects. Discuss effects of proposed amendment on groundwater or groundwater recharge.

- e. State Water Plan. Describe how proposed amendment addresses a water supply need in a manner that is consistent with the state water plan or the applicable approved regional water plan for any area in which the proposed appropriation is located or, in the alternative, describe conditions that warrant a waiver of this requirement. The state and regional water plans are available for download at:
<http://www.twdb.texas.gov/waterplanning/swp/index.asp>.
- f. Waste Avoidance. Provide evidence that reasonable diligence will be used to avoid waste and achieve water conservation as defined in TWC § 11.002. Examples of evidence could include, but are not limited to, a water conservation plan or, if required, a drought contingency plan, meeting the requirements of 30 TAC Chapter 288.
- g. Impacts on Water Rights or On-stream Environment. Explain how the proposed amendment will not impact other water right holders or the on-stream environment beyond and irrespective of the fact that the water right can be used to its full authorized amount.

SUPPLEMENTAL INFORMATION

INTRODUCTION AND BACKGROUND

Vistra Corporate Services Company LLC (Vistra) owns Certificate of Adjudication 12-4097 (the "Certificate"), which authorizes it to: (1) maintain an existing dam and reservoir on Panther Creek and an existing dam and reservoir on Squaw Creek and impound therein not to exceed a combined total of 151,500 acre-feet of water in the two reservoirs; and (2) divert and consumptively use not to exceed a combined 23,180 acre-feet of water per annum from the aforesaid reservoirs for the operation of owners nuclear-fueled electric power generating plant and industrial (condenser cooling) purposes. The Certificate is attached hereto as Attachment B.

The Certificate is the source of water for cooling and operating needs at the Comanche Peak Nuclear Power Plant (CPNPP). Vistra wishes to have the ability to sell or lease water appropriated under the Certificate to others so that the water may be beneficially used within Squaw Creek Reservoir, located within Hood and Somervell Counties.

Through this application, Vistra respectfully requests that the Texas Commission on Environmental Quality (the "Commission") amend the Certificate to 1) Add Industrial, agricultural and recreational consumptive uses to Sections 2.A.; 2) Amend the use description in Section 2.A. to read "Owner is authorized to divert and use not to exceed 2,400 acre-feet of water per annum from Squaw Creek Reservoir for industrial, agricultural and recreational use. 3) Add agricultural and recreational consumptive uses to Section 2.B. 4) Amend the use description in Section 2.B. to delete "(condenser cooling)" from the currently authorized industrial use. 5) Amend the diversion point to specify the location of use is located in Hood and Somervell Counties; 6) Amend the description in Section 3.B.1 to read "from Squaw Creek Reservoir for industrial, agricultural and recreational use."

No other amendment to the Certificate is requested.

SUPPLEMENTAL INFORMATION

MARSHALL CRITERIA

- a. Administrative Requirements and Fees. *Confirm whether application meets the administrative requirements for an amendment to a water use permit pursuant to TWC Chapter 11 and Title 30 Texas Administrative Code (TAC) Chapters 281, 295, and 297. An amendment application should include, but is not limited to, a sworn application, maps, completed conservation plan, fees, etc.*

The sworn Application provides all required information necessary to comply with the administrative requirements for amendment of a water rights permit, including Title 30, Texas Administrative Code Chapter 295 (related to water rights procedural rules) and the requirements of Chapter 11 of the Texas Water Code. Pursuant to Title 30, Texas Administrative Code Section and other TCEQ rules related to fees, a check for \$112.50 is enclosed. Vistra respectfully requests a determination of any additional fees that are due. Vistra will remit payment of additional fees upon receipt of the TCEQ's determination.

- b. Beneficial Use. *Discuss how proposed amendment is a beneficial use of the water as defined in TWC § 11.002 and listed in TWC § 11.023. Identify the specific proposed use of the water (e.g., road construction, hydrostatic testing, etc.) for which the amendment is requested.*

The proposed amendments include requests that would increase the flexibility of the water right, maximizing Vistra's ability to efficiently put to beneficial use the water appropriated to it within Squaw Creek Reservoir. Each of the uses proposed for the amended Certificate is specifically enumerated in Texas Water Code Section 11.023 as a beneficial use for which state water may be appropriated, stored, or diverted. The amendments also seek to cure ambiguous and ineffective provisions within the Certificate.

- c. Public Welfare. *Explain how proposed amendment is not detrimental to the public welfare. Consider any public welfare matters that might be relevant to a decision on the application. Examples could include concerns related to the well-being of humans and the environment.*

The proposed amendment would add flexibility to the beneficial purposes to which the appropriated water can be applied. The increased flexibility will allow Vistra to use the water it has been appropriated in the most efficient manner possible and to sell or lease water that it is not currently using under the Certificate. Maximizing efficiency of surface water use in Squaw Creek Reservoir is in the public interest and is not detrimental to the public welfare.

- d. Groundwater Effects. *Discuss effects of proposed amendment on groundwater or groundwater recharge.*

Under Texas Water Code Section 11.151, the Commission must consider the potential effects of the Application, if any, on groundwater or groundwater recharge. The Application requests only amendments that would add flexibility and clarification to the existing Certificate of Adjudication. It will have no impact on groundwater resources, either by withdrawal or recharge.

- e. State Water Plan. *Describe how proposed amendment addresses a water supply need in a manner that is consistent with the state water plan or the applicable approved regional water plan for any area in which the proposed appropriation is located or, in the alternative, describe conditions that warrant a waiver of this requirement. The state and regional water plans are available for download at: <http://www.twdb.texas.gov/waterplanning/swp/index.asp>.*

As required by Texas Water Code Section 11.134(b)(3)(E), the proposed amendment addresses a water supply need in a manner that is consistent with the State Water Plan and the relevant approved regional water plan. The Region G Regional Water Plan and the State Water Plan include water supply demands in the Brazos River Basin for agricultural, recreational, and industrial purposes. The proposed amendment seeks to add flexibility to the Certificate so that it can be used to meet those needs. The proposed amendment is not inconsistent with, and does not conflict with, any project in the Region G Regional Water Plan or the State Water Plan.

- f. Waste Avoidance. *Provide evidence that reasonable diligence will be used to avoid waste and achieve water conservation as defined in TWC § 11.002. Examples of evidence could include, but are not limited to, a water conservation plan or, if required, a drought contingency plan, meeting the requirements of 30 TAC Chapter 288.*

Vistra's purpose in requesting this amendment is to enable Vistra to sell or lease water appropriated under the Certificate that the facility is not currently using for its own purposes. Should the Certificate or a portion of it be sold, the Commission will have the authority to require the new owner to submit a water conservation and/or drought contingency plan, as appropriate.

- g. Impacts on Water Rights or On-stream Environment. *Explain how proposed amendment will not impact other water right holders or the on-stream environment beyond and irrespective of the fact that the water right can be used to its full authorized amount.*

In its decision in *City of Marshall*, the Texas Supreme Court held that the Commission should evaluate whether a proposed amendment will affect other water rights holders or the environment "beyond or irrespective of" the full-use assumption. The Court gave some examples of changes that could have such potential effects, including moving a diversion point upstream from a senior water right holder or changing a use from a non-consumptive use to a consumptive use. The proposed amendments do not request a change in the existing diversion points, all of which are from an existing storage reservoir. The Application does not request any amendment that creates a potential adverse impact on other water rights holders or the environment beyond or irrespective of the full-use assumption. Additionally, this application does not include any requests for interbasin transfers.
