

parimutuel racetrack licenses in Dallas, Tarrant, and Bexar Counties.

Because the current application period for these counties end on September 28, 1990, the designation of the November application period is contingent on no applications being filed on or before September 28, 1990. If an application is filed on or before September 28, 1990, the November application period for the applicable county is void and does not take effect.

Under Texas Racing Commission rules, the Commission may designate an application period of not more than 60 days in, which application documents for a racetrack license may be filed.

On September 12, 1990, the Texas Racing Commission's Horse Racing Section adopted an additional 30-day time period for accepting Class I applications and designated the period from 8 a.m., November 1, 1990-5 p.m., November 30, 1990.

For more information contact Lisa Gonzales, Hearings Coordinator, at (512) 476-7223. The Texas Racing Commission offices are located at 400 West 15th, Austin, Texas 78701 or write to P.O. Box 12080, Austin, Texas 78711

## Texas Water Commission Enforcement Orders

Pursuant to the Texas Water Code, which states that if the commission finds that a violation has occurred and a civil penalty is assessed, the commission shall file notice of its decision in the *Texas Register* not later than the 10th day after the date on which the decision is adopted, the following information is submitted.

An enforcement order was issued to Gordon B. Sutton doing business as Uvalde Water Supply Company, on September 14, 1990, assessing \$1,000 in administrative penalties.

Information concerning any aspect of this order may be obtained by contacting Wendall Corrigan, Staff Attorney, Texas Water Commission, P.O. Box 13087, Austin, Texas 78711-3087, (512) 463-8069.

Issued in Austin, Texas, on September 14, 1990.

## Public Notice

The Texas Water Commission is required under the Texas Solid Waste Disposal Act, Texas Health and Safety Code, Chapter 361, as amended by Acts 1989, 71st Legislature, Chapter 703, §5 (amending Texas Civil Statutes Article 447-7, §13) (the Act), to identify and assess facilities that may constitute an imminent and substantial endangerment to public health and safety or the environment due to a release or threatened release of hazardous substances into the environment. A registry identifying those sites was published in the *Texas Register* on April 18, 1989 (14 TexReg 1882). Pursuant to the Act, §13(a) the commission must update the registry annually to identify any such facilities and the relative priority for action at each listed facility.

The following is a list of facilities or areas that the Executive Director of the Texas Water Commission has determined are eligible for, and which the Executive Director intends to list on, the state registry. Also specified is the general nature of the potential endangerment to public health and safety or the environment as determined by information currently available to the executive director.

Site Number 1—Old Lufkin Creosoting; 1411 East Lufkin Ave., Lufkin, Angelina County. This site was a creosoting facility which generated hazardous waste including creosote constituents. The hazards presented by this site are

potential ground water contamination and direct human contact. Observed release of contamination to surface water is documented.

Site Number 2—Higgins Wood Preserving; bounded on the west by Timberland (Hwy 59), on the east by Warren Street, and on the north by Paul Street, Lufkin, Angelina County. This site was a creosoting facility which generated hazardous waste including pentachlorophenol and creosote constituents. The hazards presented by this site are potential ground water, and surface water contamination and direct human contact.

Site Number 3—Marshall Wood Preserving; 2700 West Houston Street, Marshall, Harrison County. This site is an inactive facility which pressure treated wood with pentachlorophenol and creosote. The site contains an area of soil contamination and two large surface impoundments which contain pentachlorophenol and creosote constituents. Potential hazards presented by this site include ground water contamination and surface water contamination from run-off. Direct contact is also of concern since the site is not adequately secured.

Site Number 4—J.C.S. Company; 1.5 miles north of State Highway 198 on Van Zandt County Road #2410 to the east of Phalba, Van Zandt County. This site was a battery recycling facility which generated hazardous waste including lead. The potential hazards presented by this site include ground water and surface water contamination, direct human exposure to respirable dusts, and food chain uptake of lead.

Site Number 5—Jerrell B. Thompson Incorporated; 3/4 of a mile north of State Hwy 198 on Van Zandt County Road #2410 to the east of Phalba, Van Zandt County. This site was a battery recycling facility which generated hazardous waste including lead and cadmium. The hazards presented by this site are potential ground water and surface water contamination from the lead and cadmium remaining on site.

Site Number 6—Thompson Hayward Chemical Company; located on United States Highway 277, 1/2 mile south of Munday, Knox County. This site is an inactive facility which once was the location of a pesticide formulation plant which blended and diluted parathion and DDT. The potential hazard presented by this site is ground water contamination. Direct contact is also a high concern since the site is not secured.

Site Number 7—Jensen Drive Scrap; 3603 Jensen Drive, Houston, Harris County. This site is an inactive scrap salvage facility. PCB laden transformer oil was disposed of on-site (poured directly onto the ground) without treatment or containment. On-site soil samples show elevated levels of PCB, lead, other heavy metals and several organic compounds. The potential hazards presented by this facility are ground water contamination. Direct contact is also a high concern since the site is not secured and is accessible to frequent trespassers.

Site Number 8—Pioneer Oil Refining Company; adjacent to the municipal sewage treatment plant at 20280 South Payne, Somerset, Bexar County. This site is an abandoned oil refinery facility with two large surface pits which contain a tarry hydrocarbon substance. The potential hazards presented by this facility are ground water and surface water contamination. Direct contact is also of concern since migration of the contaminants has been documented on the adjacent property. Public meetings have been scheduled to receive information about the proposed listing and the identification of potentially responsible parties. The public meetings will be legislative in nature and not a contested case hearing under the Texas Administrative

Procedure and Texas Register Act (Texas Civil Statutes, Article 6252-13a). Persons desiring to comment on the proposed listing of any of these sites may do so in the context of the public meeting either orally or in writing. Written comments may also be submitted to the attention of Jim Feeley, Superfund and Emergency Response Section, Texas Water Commission, P. O. Box 13087, Austin, Texas 78711-3087; (512) 463-7785.

The public meetings have been scheduled for the following times and places.

Site Number 1—Lufkin, Texas on October 24, 1990, at 7 p.m., City Council Chambers, Room 102, 300 East Shepherd, Lufkin, Angelina County.

Site Number 2—Lufkin, Texas on October 24, 1990, at 7 p.m., City Council Chambers, Room 102, 300 East Shepherd, Lufkin, Angelina County.

Site Number 3—Marshall, Texas on October 25, 1990, at 7 p.m., County Court at Law Courtroom, W. Houston and Wellington, Marshall, Harrison County.

Site Number 4—In Canton, Texas on October 26, 1990, at 7 p.m., City Hall, City Council Chambers, 290 East Tyler Street, Canton, Van Zandt County.

Site Number 5—In Canton, Texas on October 26, 1990, at 7 p.m., City Hall, City Council Chambers, 290 East Tyler Street, Canton, Van Zandt County.

Site Number 6—In Munday, Texas, on October 29, 1990, at 7 p.m., City Hall, Council Chambers, 121 East Main, Munday, Knox County.

Site Number 7—Houston, Texas, on October 30, 1990, at 7 p.m., City of Houston 5th Ward Multi-Service Center, 4014 Market, Houston, Harris County.

Site Number 8—Somerset, Texas, on October 31, 1990, at 7 p.m., The Community Center, 7995 6th Street, Somerset, Bexar County.

The Executive Director of the Texas Water Commission has prepared a brief summary of the TWC's public records regarding the site. This summary, as well as the public records themselves, are available for inspection and copying during regular Commission business hours. Such information may be obtained by contacting Mr. Sheldon Seibel, Central Records Center, Texas Water Commission, P. O. Box 13087, Austin, Texas 78711-3087; (512) 463-8562. Copying of file information is subject to payment of a fee. Other information may also be obtained from Stephen Dickman, Staff Attorney, Texas Water Commission, at the same address; (512) 463-8069.

Issued in Austin, Texas, on September 19, 1990.

## Request for Proposals

The Texas Water Commission (TWC) announces that it wishes to retain the services of a consultant to perform remedial investigation/feasibility studies (RI/FS) at two state superfund sites. These sites are known as the Texas American Oil State Superfund site located in Ellis County and the Precision Machine and Supply State Superfund site located in Ector County.

Contingent upon approval by the TWC, the consultant's
