

**Last Revised: February 6, 2025****Summary of Updates to the Tables Accompanying the Texas Risk Reduction Program (TRRP) Rule<sup>1</sup>**

| Date of Change | Change Made                                                                                                                                                                                                                                                                 |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2/6/2025       | Dioxins/furans, polychlorinated; (reported as 2,3,7,8-TCDD TEQ): RfD and PCLs revised                                                                                                                                                                                       |
| 2/6/2025       | Perfluorododecanoic acid (Dodecanoic acid, tricosafuoro-) [PFDoA] and Perfluorotridecanoic acid (Tridecanoic acid, pentacosafuoro-) [PFTrDAI]: PCLs revised due to increased rounding accuracy.                                                                             |
| 2/6/2025       | Carbon tetrachloride: URF and RfC revised                                                                                                                                                                                                                                   |
| 2/6/2025       | Tert-butyl alcohol (2-methyl-2-propanol): RfDo revised and RfC added                                                                                                                                                                                                        |
| 2/6/2025       | Beryllium: RfC revised                                                                                                                                                                                                                                                      |
| 2/6/2025       | Nitrobenzene: RfC revised                                                                                                                                                                                                                                                   |
| 2/6/2025       | RfDo value for 1-propanol was corrected to 2 mg/kg-day on the Toxicity Factors table to reflect the value used in RBEL calculations                                                                                                                                         |
| 5/10/2023      | Nitrate: <sup>GW</sup> Soil <sub>Ing</sub> PCLs removed from 30 acre source area in Tables 1 and 2 to be consistent with the 11/8/2019 change (see footnote in PCL tables)                                                                                                  |
| 5/10/2023      | Bromodichloromethane, Bromoform, Chloroform, and Dibromochloromethane: <sup>GW</sup> GW <sub>Ing</sub> PCLs were corrected with the MCL for total trihalomethanes in Table 3. <sup>GW</sup> Soil <sub>Ing</sub> PCLs were corrected in Tables 1 and 2                       |
| 3/6/2023       | Dibenzothiophene: RfD revised                                                                                                                                                                                                                                               |
| 3/6/2023       | Perfluorobutyric acid (Butanoic acid, heptafluoro-) [PFBA]: RfD and RfC revised                                                                                                                                                                                             |
| 3/6/2023       | Perfluorohexanoic acid (Hexanoic acid, undecafluoro-) [PFHxA]: RfD revised                                                                                                                                                                                                  |
| 3/6/2023       | Perfluoropentanoic acid (Pentanoic acid, nonafluoro-) [PFPeA]: RfD revised                                                                                                                                                                                                  |
| 3/1/2022       | Glyphosate: RfDo revised                                                                                                                                                                                                                                                    |
| 3/1/2022       | Thallium: CAS corrected from 7791-12-0 to 7440-28-0 in Toxicity Factors, Chem/Phys Properties, and ABS <sub>GI</sub> /ABS.d tables.                                                                                                                                         |
| 1/6/2021       | Amino-2,6-dinitrotoluene, 4-: Sfo and RfDo revised                                                                                                                                                                                                                          |
| 1/6/2021       | Amino-2,6-dinitrotoluene, 2-: Sfo and RfDo revised                                                                                                                                                                                                                          |
| 1/6/2021       | Bis (2-chloro-1-methyl) ether: Name corrected to Bis (2-chloro-1-methylethyl) ether                                                                                                                                                                                         |
| 1/6/2021       | Bromodichloromethane: RfDo revised                                                                                                                                                                                                                                          |
| 1/6/2021       | Bromomethane: RfC revised                                                                                                                                                                                                                                                   |
| 1/6/2021       | Dichlorophenoxyacetic acid, 2,4- (2,4-D): RfDo revised                                                                                                                                                                                                                      |
| 1/6/2021       | Ethylene oxide: Class, URF revised                                                                                                                                                                                                                                          |
| 1/6/2021       | Hexanone, 2-: RfDo revised                                                                                                                                                                                                                                                  |
| 1/6/2021       | Lithium: RfDo revised                                                                                                                                                                                                                                                       |
| 1/6/2021       | Nitropropane, 2-: URF revised                                                                                                                                                                                                                                               |
| 1/6/2021       | Perfluorooctane sulfonamide (1-Octanesulfonamide, heptadecafluoro-): Name corrected to Perfluorooctane sulfonamide (1-Octanesulfonamide, heptadecafluoro-)                                                                                                                  |
| 1/6/2021       | Perfluorooctanoic sulfonic acid (1-Octanesulfonic acid, heptadecafluoro-1-): Name corrected to Perfluorooctane sulfonic acid (1-Octanesulfonic acid, heptadecafluoro-1-)                                                                                                    |
| 1/6/2021       | PFAS (All): The common acronym for each compound was added                                                                                                                                                                                                                  |
| 1/6/2021       | Phosphorotriethioic acid, S,S,S-tributyl ester: RfDo revised                                                                                                                                                                                                                |
| 1/6/2021       | Propanol, 1-: RfDo revised                                                                                                                                                                                                                                                  |
| 1/6/2021       | Tetrachloroethylene: The common acronym (PCE) was added                                                                                                                                                                                                                     |
| 1/6/2021       | Trichloroethylene: The common acronym (TCE) was added                                                                                                                                                                                                                       |
| 11/8/2019      | Benzo(i)fluoranthene: Sfo and URF revised                                                                                                                                                                                                                                   |
| 11/8/2019      | Bis (2-chloroisopropyl) ether: Name changed to Bis (2-chloro-1-methyl) ether                                                                                                                                                                                                |
| 11/8/2019      | Bromodichloromethane: <sup>GW</sup> GW <sub>Ing</sub> PCLs were replaced with the MCL for total trihalomethanes in Table 3, <sup>GW</sup> Soil <sub>Ing</sub> PCLs were revised in Tables 1 and 2, and footnote for total trihalomethanes was revised in Tables 1, 2 and 3. |
| 11/8/2019      | Bromoform: <sup>GW</sup> GW <sub>Ing</sub> PCLs were replaced with the MCL for total trihalomethanes in Table 3, <sup>GW</sup> Soil <sub>Ing</sub> PCLs were revised in Tables 1 and 2, and footnote for total trihalomethanes was revised in Tables 1, 2 and 3.            |
| 11/8/2019      | Chloroform: <sup>GW</sup> GW <sub>Ing</sub> PCLs were replaced with the MCL for total trihalomethanes in Table 3, <sup>GW</sup> Soil <sub>Ing</sub> PCLs were revised in Tables 1 and 2, and footnote for total trihalomethanes was revised in Tables 1, 2 and 3.           |
| 11/8/2019      | Cyclotrimethylenetrinitramine (RDX): Class, Sfo and RfD revised                                                                                                                                                                                                             |
| 11/8/2019      | Dibromochloromethane: <sup>GW</sup> GW <sub>Ing</sub> PCLs were replaced with the MCL for total trihalomethanes in Table 3, <sup>GW</sup> Soil <sub>Ing</sub> PCLs were revised in Tables 1 and 2, and footnote for total trihalomethanes was revised in Tables 1, 2 and 3. |
| 11/8/2019      | Dichloroethane, 1,2-: RfD revised                                                                                                                                                                                                                                           |
| 11/8/2019      | Diethanolamine: RfC added                                                                                                                                                                                                                                                   |
| 11/8/2019      | Dodecylphenol, 4-: Duplicate rows were eliminated                                                                                                                                                                                                                           |
| 11/8/2019      | Nitrate: <sup>GW</sup> Soil <sub>Ing</sub> PCLs removed (see footnote in PCL tables)                                                                                                                                                                                        |
| 11/8/2019      | Nonylphenol, 4-n-: Duplicate rows were eliminated                                                                                                                                                                                                                           |
| 11/8/2019      | Potassium: CAS revised                                                                                                                                                                                                                                                      |
| 11/8/2019      | Toxaphene: RfD added                                                                                                                                                                                                                                                        |
| 11/8/2019      | Triethanolamine: RfC added                                                                                                                                                                                                                                                  |
| 4/27/2018      | Chlorine: RfC revised                                                                                                                                                                                                                                                       |
| 4/27/2018      | Cobalt: URF and RfC revised                                                                                                                                                                                                                                                 |
| 4/27/2018      | Ethylene dibromide (dibromoethane, 1,2-): Class, URF and RfC revised                                                                                                                                                                                                        |
| 4/27/2018      | Manganese: RfC revised                                                                                                                                                                                                                                                      |
| 4/27/2018      | Transformer Mineral Oil: Added back into tables (accidentally left out in previous years)                                                                                                                                                                                   |
| 3/31/2017      | Benz(a)anthracene : Class, Sfo and URF revised                                                                                                                                                                                                                              |
| 3/31/2017      | Benzo-a-pyrene : Class, Sfo and URF revised; RfD and RfC added                                                                                                                                                                                                              |
| 3/31/2017      | Benzo-b-fluoranthene : Class, Sfo and URF revised                                                                                                                                                                                                                           |
| 3/31/2017      | Benzo-k-fluoranthene : Class, Sfo and URF revised                                                                                                                                                                                                                           |
| 3/31/2017      | Cadmium : Class, URF and RfC revised                                                                                                                                                                                                                                        |
| 3/31/2017      | Chromium (VI) : Class and RfD revised                                                                                                                                                                                                                                       |
| 3/31/2017      | Chrysene : Class, Sfo and URF revised                                                                                                                                                                                                                                       |
| 3/31/2017      | Dibenz-a,h-anthracene : Class, Sfo and URF revised                                                                                                                                                                                                                          |
| 3/31/2017      | Dichloroethane, 1,2- : URF and RfC revised                                                                                                                                                                                                                                  |
| 3/31/2017      | Dichloropropane, 1,2- : Class, Sfo, and RfD revised and URF added                                                                                                                                                                                                           |
| 3/31/2017      | Dimethylformamide, N,N- : NEW                                                                                                                                                                                                                                               |
| 3/31/2017      | Ethanol, 2-amino- : RfC added                                                                                                                                                                                                                                               |
| 3/31/2017      | Ethylene oxide : Class and URF revised                                                                                                                                                                                                                                      |
| 3/31/2017      | Heptane, n- : RfC revised                                                                                                                                                                                                                                                   |
| 3/31/2017      | Hexachloropropylene : Sfo and RfD revised, URF removed and RfC added                                                                                                                                                                                                        |
| 3/31/2017      | Indeno-1,2,3-cd-pyrene : Class, Sfo and URF revised                                                                                                                                                                                                                         |

**Last Revised: February 6, 2025****Summary of Updates to the Tables Accompanying the Texas Risk Reduction Program (TRRP) Rule<sup>1</sup>**

| Date of Change | Change Made                                                                                                                                                                                                                                                         |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3/31/2017      | Mercuric chloride : Chemical listing removed from tables. Mercury toxicity factors apply to all inorganic forms of mercury.                                                                                                                                         |
| 3/31/2017      | Nitrate : name revised to Nitrate-N to be consistent with MCLs. Laboratories should report results in nitrate as nitrogen (Nitrate-N). If a laboratory reports the results in nitrate as nitrate (Nitrate-NO3), the conversion is Nitrate-N = 0.2259 x Nitrate-NO3. |
| 3/31/2017      | Nitrite : name revised to Nitrite-N to be consistent with MCLs. Laboratories should report results in nitrite as nitrogen (Nitrite-N). If a laboratory reports the results in nitrite as nitrite (Nitrite-NO2), the conversion is Nitrite-N = 0.3045 x Nitrite-NO2. |
| 3/31/2017      | Pentane : RfD revised                                                                                                                                                                                                                                               |
| 3/31/2017      | Phenol, 4-tert-butyl- : RfD revised                                                                                                                                                                                                                                 |
| 3/31/2017      | Thallium and compounds : name revised to Thallium and RfD revised                                                                                                                                                                                                   |
| 3/31/2017      | Triaminotrinitrobenzene (TATB) : Sfo removed                                                                                                                                                                                                                        |
| 3/31/2017      | Trichloro-1,2,2-trifluoroethane, 1,1,2- : RfC revised                                                                                                                                                                                                               |
| 3/31/2017      | Trimethylbenzene, 1,2,3- : RfD and RfC revised                                                                                                                                                                                                                      |
| 3/31/2017      | Trimethylbenzene, 1,2,4- : RfD and RfC revised                                                                                                                                                                                                                      |
| 3/31/2017      | Trimethylbenzene, 1,3,5- : RfD and RfC revised                                                                                                                                                                                                                      |
| 3/4/2016       | Asbestos, removed from all tables: URF removed in 2011. Contact your TCEQ project manager if asbestos may be a chemical of concern.                                                                                                                                 |
| 3/4/2016       | Chlordane, gamma : name revised to Chlordane, trans- (gamma chlordane)                                                                                                                                                                                              |
| 3/4/2016       | Dimethyl-2-nitrobenzene, 1,3- : NEW                                                                                                                                                                                                                                 |
| 3/4/2016       | Dimethyl-3-nitrobenzene, 1,2- : NEW                                                                                                                                                                                                                                 |
| 3/4/2016       | Dimethyl-4-nitrobenzene, 1,2- : NEW                                                                                                                                                                                                                                 |
| 3/4/2016       | Dimethyl-5-nitrobenzene, 1,3- : NEW                                                                                                                                                                                                                                 |
| 3/4/2016       | Ethoxy ethanol, 2- : Henry's Law Constant revised                                                                                                                                                                                                                   |
| 3/4/2016       | Perfluorooctanoic sulfonic acid (1-Octanesulfonic acid, heptadecafluoro-1-) : RfC revised                                                                                                                                                                           |
| 3/4/2016       | Perfluoropentanoic acid (Pentanoic acid, nonafluoro-) : RfD revised                                                                                                                                                                                                 |
| 3/4/2016       | Perfluorohexanoic acid (Hexanoic acid, undecafluoro-) : RfD revised                                                                                                                                                                                                 |
| 3/4/2016       | Perfluorododecanoic acid (Dodecanoic acid, tricosafuoro-) : RfC revised                                                                                                                                                                                             |
| 3/4/2016       | Perfluorodecanoic acid (Decanoic acid, nonadecafluoro-) : RfC revised                                                                                                                                                                                               |
| 3/4/2016       | Perfluorohexane sulfonic acid (1-Hexanesulfonic acid, tridecafluoro-) : RfD and RfC revised                                                                                                                                                                         |
| 3/4/2016       | Perfluorobutyric acid (Butanoic acid, heptafluoro-) : RfC revised                                                                                                                                                                                                   |
| 3/4/2016       | Perfluorobutane sulfonic acid (1-Butanesulfonic acid, nonafluoro-) : RfC revised                                                                                                                                                                                    |
| 12/16/2015     | Ammonia: Class and RfC revised                                                                                                                                                                                                                                      |
| 12/16/2015     | Chromium (VI): URF and RfC revised                                                                                                                                                                                                                                  |
| 12/16/2015     | Dicyclopentadiene: Class and RfD revised and RfC was removed                                                                                                                                                                                                        |
| 12/16/2015     | Ethyl acrylate: RfD and RfC added                                                                                                                                                                                                                                   |
| 12/16/2015     | Isopropyl alcohol: RfD revised and RfC added                                                                                                                                                                                                                        |
| 12/16/2015     | Methyl-5-nitroaniline, 2- (5-nitro-o-toluidine): Chemical removed from PCL Tables because Sfo removed in 2014 and the chemical has no other toxicity factors                                                                                                        |
| 12/16/2015     | Perfluoro Acids (All): RfDs revised                                                                                                                                                                                                                                 |
| 12/16/2015     | Phenol: Class revised and RfC added                                                                                                                                                                                                                                 |

| 9/10/2014      | Perfluoroundecanoic acid (Undecanoic acid, uncosafuoro-): NEW                                                                                                                                                               |
| 9/10/2014      | Phenothiazine: RfD revised                                                                                                                                                                                                  |
| 9/10/2014      | Prometryn: NEW                                                                                                                                                                                                              |
| 9/10/2014      | Tetrachloroethylene: RfD revised                                                                                                                                                                                            |
| 9/10/2014      | Toluidine, o: Class and Sfo revised                                                                                                                                                                                         |
| 9/10/2014      | Toluidine, p: Class and Sfo revised                                                                                                                                                                                         |
| 9/10/2014      | Trinitrophenylmethylnitramine (tetryl; nitramine): RfD revised                                                                                                                                                              |
| 9/10/2014      | Uranium (soluble salts): RfC revised                                                                                                                                                                                        |
| 6/29/2012      | Benzenethiol: RfD revised                                                                                                                                                                                                   |
| 6/29/2012      | Chloro-1,3-butadiene, 2-: Class, URF, and RfC revised                                                                                                                                                                       |
| 6/29/2012      | Diisopropyl ether (2,2'-oxybis-propane): RfC revised                                                                                                                                                                        |
| 6/29/2012      | Dioxins/furans, polychlorinated; (reported as 2,3,7,8-TCDD TEQ): RfD was revised by USEPA; however, the TRRP rule sets the critical PCL at all 3 tiers for dioxin in soil [30 TAC 350.76(e)(3)] so the PCLs did not change. |
| 6/29/2012      | Ethyl-2-methyl benzene, 1-: RfD revised                                                                                                                                                                                     |
| 6/29/2012      | Ethyl-4-methyl benzene: RfD revised                                                                                                                                                                                         |
| 6/29/2012      | Hexachloroethane: Class, Sfo, RfD, URF, and RfC revised                                                                                                                                                                     |
| 6/29/2012      | Methoxyethanol, 2-: RfD revised                                                                                                                                                                                             |
| 6/29/2012      | Methyl-5-nitroaniline, 2- (5-nitro-o-toluidine): Class and Sfo revised                                                                                                                                                      |
| 6/29/2012      | Methylene chloride (dichloromethane): Class, Sfo, RfD, URF, and RfC revised                                                                                                                                                 |
| 6/29/2012      | Nickel and compounds: Class, URF, and RfC revised                                                                                                                                                                           |
| 6/29/2012      | Pentane: RfC revised                                                                                                                                                                                                        |
| 6/29/2012      | Phenothiazine: RfD revised                                                                                                                                                                                                  |
| 6/29/2012      | Sulfolane: RfD revised                                                                                                                                                                                                      |
| 6/29/2012      | Tetrachloroethylene: Class, Sfo, and RfD revised                                                                                                                                                                            |
| 6/29/2012      | Tetrahydrofuran: Class, RfD, and RfC revised                                                                                                                                                                                |
| 6/29/2012      | Trichloroethane, 1,1,1: Class and RfC revised                                                                                                                                                                               |
| 6/29/2012      | Trichloroethylene: Class, Sfo, RfD, URF, and RfC revised                                                                                                                                                                    |
| 6/29/2012      | Vanadium: RfD and RfC revised                                                                                                                                                                                               |
| 6/29/2012      | Added: Cyclohexene, 4-ethenyl-(aka 4-vinylcyclohexene); Isopentane; Cyclopentane; Methylstyrene, alpha-; Morpholine, 4-butyl                                                                                                |
| 5/24/2011      | Asbestos : URF (Unit Risk Factors) and soil PCLs removed. Contact your TCEQ Project Manager if asbestos may be a chemical of concern.                                                                                       |
| 5/24/2011      | Glyphosate : chemical/physical properties revised. Ionizing Koc data under review. Contact your TCEQ Project Manager if glyphosate may be a chemical of concern.                                                            |
| 5/24/2011      | TCDD, 2,3,7,8: (dioxin) : named revised to Dioxins/furans, polychlorinated; (reported as 2,3,7,8:TCDD TEQ)                                                                                                                  |
| 5/24/2011      | See list on next sheet for additional toxicity factors changes. For questions on toxicity factors, contact the Toxicology Section at 877-992-8370.                                                                          |
| 5/24/2011      | Added: Leptophos, Ethanol, 2-(methylamino)-, Hexene, cis-2-, Pentadiene, cis-1,3-, Cyclopentene, Pentene, 2.                                                                                                                |
| 3/31/2010      | Acrylamide : Sfo, RfD, URF and RfC revised                                                                                                                                                                                  |
| 3/31/2010      | Benzyl alcohol : RfD revised                                                                                                                                                                                                |
| 3/31/2010      | Bromobenzene : RfD and RfC revised                                                                                                                                                                                          |
| 3/31/2010      | Butanol, 2-: RfD and RfC revised                                                                                                                                                                                            |
| 3/31/2010      | Chromium (III) : RfC revised                                                                                                                                                                                                |
| 3/31/2010      | Chromium (Total) : RfC revised                                                                                                                                                                                              |
| 3/31/2010      | Diethylene glycol monobutyl ether : RfD and RfC revised                                                                                                                                                                     |
| 3/31/2010      | Fluorine : RfC revised                                                                                                                                                                                                      |
| 3/31/2010      | Hexanone, 2-: RfD and RfC revised                                                                                                                                                                                           |
| 3/31/2010      | Hydrazine : RfC revised                                                                                                                                                                                                     |
| 3/31/2010      | Hydroquinone : Sfo revised                                                                                                                                                                                                  |
| 3/31/2010      | Kepone (chlordecone) : Sfo and RfD revised                                                                                                                                                                                  |
| 3/31/2010      | Pentane : RfC revised                                                                                                                                                                                                       |
| 3/31/2010      | Titanium : RfD revised                                                                                                                                                                                                      |
| 3/31/2010      | Trichlorobenzene, 1,2,4- : Sfo and RfC revised                                                                                                                                                                              |
| 3/31/2010      | Trichloropropane, 1,2,3- : Sfo, RfD, and RfC revised                                                                                                                                                                        |
| 3/31/2010      | Vanadium : RfD revised                                                                                                                                                                                                      |
| 3/31/2010      | Added : Hexanedinitrile                                                                                                                                                                                                     |
| 3/25/2009      | Allyl Alcohol : RfC revised.                                                                                                                                                                                                |
| 3/25/2009      | Benzyl chloride: RfD and RfC revised.                                                                                                                                                                                       |
| 3/25/2009      | Bromobenzene: RfD and RfC revised.                                                                                                                                                                                          |
| 3/25/2009      | Butadiene, 1,3- : URF and RfC revised.                                                                                                                                                                                      |
| 3/25/2009      | Butyl benzyl phthalate : Sfo revised.                                                                                                                                                                                       |
| 3/25/2009      | Chloroaniline, p- : Sfo revised.                                                                                                                                                                                            |
| 3/25/2009      | Chloronitrobenzene, p- (1-chloro-4-nitrobenzene) : Sfo revised.                                                                                                                                                             |

**Last Revised: February 6, 2025****Summary of Updates to the Tables Accompanying the Texas Risk Reduction Program (TRRP) Rule<sup>1</sup>**

| Date of Change | Change Made                                                                                                                                             |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3/25/2009      | Cobalt : RfD and RfC revised.                                                                                                                           |
| 3/25/2009      | Dibromo-3-chloropropane, 1,2- : URF revised.                                                                                                            |
| 3/25/2009      | Dichloro-2-butene, 1,4- :URF revised.                                                                                                                   |
| 3/25/2009      | Dichloro-2-butene, trans-1,4- :URF revised.                                                                                                             |
| 3/25/2009      | Dichlorobenzene, 1,4- : RfC revised.                                                                                                                    |
| 3/25/2009      | Dichloroethane, 1,2-: RfD revised.                                                                                                                      |
| 3/25/2009      | Dimethylbenzidine, 3,3'-: Sfo revised.                                                                                                                  |
| 3/25/2009      | Dinitrobenzene, 1,3- (dinitrobenzene, 2,4- ) : RfD revised.                                                                                             |
| 3/25/2009      | Formaldehyde : URF and RfC revised.                                                                                                                     |
| 3/25/2009      | Formic acid : RfC revised.                                                                                                                              |
| 3/25/2009      | Hydroquinone: Sfo and RfD revised.                                                                                                                      |
| 3/25/2009      | Isobutylene : RfC revised.                                                                                                                              |
| 3/25/2009      | Lithium : RfD revised.                                                                                                                                  |
| 3/25/2009      | Methylene-bis (2-chloroaniline) 4,4'- : Sfo revised.                                                                                                    |
| 3/25/2009      | Methylnaphthalene, 1- : Sfo revised.                                                                                                                    |
| 3/25/2009      | Nitroaniline, 4- :Sfo, RfD, and RfC revised.                                                                                                            |
| 3/25/2009      | Nitrobenzene : RfD, URF, and RfC revised.                                                                                                               |
| 3/25/2009      | Nitrosodimethylamine, N-: RfC revised.                                                                                                                  |
| 3/25/2009      | Nitrotoluene, o- (2-nitrotoluene) : Sfo and RfD revised.                                                                                                |
| 3/25/2009      | Propanal (propionaldehyde) : RfC revised.                                                                                                               |
| 3/25/2009      | Propylene glycol : RfD revised.                                                                                                                         |
| 3/25/2009      | Styrene : RfC revised.                                                                                                                                  |
| 3/25/2009      | Tetrachloroethane, 1,1,2,2- : RfD revised.                                                                                                              |
| 3/25/2009      | Tetrachloroethylene (PCE) : URF and RfC revised.                                                                                                        |
| 3/25/2009      | Toluene : RfC revised.                                                                                                                                  |
| 3/25/2009      | Toluenediamine, 2,6-: RfD revised.                                                                                                                      |
| 3/25/2009      | Trichloroethylene : Sfo, URF and RfC revised.                                                                                                           |
| 3/25/2009      | Trimethylbenzene, 1,2,4-: RfD revised.                                                                                                                  |
| 3/25/2009      | Vinyl Chloride : URF and RfC revised.                                                                                                                   |
| 3/25/2009      | Xylenes, Xylene, m-, Xylene, o-, and Xylene, p- : RfC revised.                                                                                          |
| 3/25/2009      | Chemicals added this year: Hexene, 1-, Diisopropylbenzene, p-                                                                                           |
| 4/23/2008      | Trichloroethane, 1,1,1- :RfC and RfD revised.                                                                                                           |
| 4/23/2008      | Benzene : RfC and URF revised.                                                                                                                          |
| 4/23/2008      | Butoxy ethanol, 2- : RfC revised.                                                                                                                       |
| 4/23/2008      | Dichloroethylene, 1,1- : RfC revised.                                                                                                                   |
| 4/23/2008      | Hexane, n- : RfC revised.                                                                                                                               |
| 4/23/2008      | Methyl amyl ketone (2:heptanone) : RfC revised.                                                                                                         |
| 4/23/2008      | Aluminum : RfD revised.                                                                                                                                 |
| 4/23/2008      | Bis (2-chloroethoxy) methane : RfD revised.                                                                                                             |
| 4/23/2008      | Chlorotoluene, p- (4-chlorotoluene) : RfD revised.                                                                                                      |
| 4/23/2008      | Dicyclopentadiene : RfC and RfD revised.                                                                                                                |
| 4/23/2008      | Dinitro-2-methylphenol, 4,6- (dinitro-o-cresol, 4, 6-) : RfD revised.                                                                                   |
| 4/23/2008      | Hexachlorobutadiene : RfD revised.                                                                                                                      |
| 4/23/2008      | Malononitrile : RfD revised.                                                                                                                            |
| 4/23/2008      | Nitroglycerin : RfD and Sfo revised.                                                                                                                    |
| 4/23/2008      | Nitrosodimethylamine, N-:RfD revised.                                                                                                                   |
| 4/23/2008      | Nitrotoluene, p- : RfD and Sfo revised.                                                                                                                 |
| 4/23/2008      | Trichlorophenol, 2,4,6- : RfD revised.                                                                                                                  |
| 4/23/2008      | Chloronitrobenzene, p- (1-chloro-4-nitrobenzene) : RfC revised.                                                                                         |
| 4/23/2008      | Dichloroethylene, trans-1,2 :RfC revised.                                                                                                               |
| 4/23/2008      | Diisopropyl ether (2,2'-oxybis-propane) : RfC revised.                                                                                                  |
| 4/23/2008      | Trimethylbenzene, 1,2,4- : RfC revised.                                                                                                                 |
| 4/23/2008      | Dibromo-3-chloropropane, 1,2- : Sfo revised.                                                                                                            |
| 4/23/2008      | Pentachloroethane : Sfo revised.                                                                                                                        |
| 4/23/2008      | Chemicals added this year : Phosphorotriethic acid, S,S,S-tributyl ester; Biphenyl, 1,1'-, 2-phenoxy-; Hexanediamine, 1,6-; Ethanol, 2-(2-aminoethoxy)- |
| 3/30/2007      | Acetone cyanohydrin : RfD and RfC revised.                                                                                                              |
| 3/30/2007      | Adipic acid (hexanedioic acid) : RfD revised.                                                                                                           |
| 3/30/2007      | Aluminum : RfD revised.                                                                                                                                 |
| 3/30/2007      | Benzyl alcohol : RfD revised.                                                                                                                           |
| 3/30/2007      | Bromobenzene : RfC revised.                                                                                                                             |
| 3/30/2007      | Cacodylic acid : RfD revised.                                                                                                                           |
| 3/30/2007      | Chlorobenzene : RfC revised.                                                                                                                            |
| 3/30/2007      | Chloroform : RfC revised.                                                                                                                               |
| 3/30/2007      | Chloronitrobenzene, p- (1-chloro-4-nitrobenzene) : Sfo revised and RfD added.                                                                           |
| 3/30/2007      | Cobalt : RfD and RfC revised and URF added.                                                                                                             |
| 3/30/2007      | Dibromo-3-chloropropane, 1,2- : RfD added.                                                                                                              |
| 3/30/2007      | Dichloroethane, 1,1- : RfD revised.                                                                                                                     |
| 3/30/2007      | Dichloropropane, 1,3- : RfD revised.                                                                                                                    |
| 3/30/2007      | Diethylene glycol monobutyl ether : RfD revised.                                                                                                        |
| 3/30/2007      | Diisopropyl ether (2,2'-oxybis-propane) : RfC revised.                                                                                                  |
| 3/30/2007      | Dimethylbenzidine, 3,3': Sfo revised.                                                                                                                   |
| 3/30/2007      | Dinitrobenzene, 1,4- : RfD revised.                                                                                                                     |
| 3/30/2007      | Dinitro-2-methylphenol, 4,6- (dinitro-o-cresol, 4, 6-) : RfD revised.                                                                                   |
| 3/30/2007      | Di:n-octyl phthalate : RfD revised.                                                                                                                     |
| 3/30/2007      | Epichlorohydrin : RfD revised.                                                                                                                          |
| 3/30/2007      | Ethylenediamine : RfD revised.                                                                                                                          |
| 3/30/2007      | Formic acid : RfC revised.                                                                                                                              |
| 3/30/2007      | Hexane, n- : RfD and RfC revised.                                                                                                                       |
| 3/30/2007      | Hexanoic acid : RfD revised.                                                                                                                            |
| 3/30/2007      | Hydroquinone : Sfo added.                                                                                                                               |
| 3/30/2007      | Kepone (chlordecone) : Sfo and RfD revised.                                                                                                             |
| 3/30/2007      | Malononitrile : RfD revised.                                                                                                                            |

**Last Revised: February 6, 2025****Summary of Updates to the Tables Accompanying the Texas Risk Reduction Program (TRRP) Rule<sup>1</sup>**

| Date of Change | Change Made                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 3/31/2006      | Hexane : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3/31/2006      | Hexanoic acid : RfD revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3/31/2006      | Nonyphenol : RfD revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3/31/2006      | Tert-amyl-methyl-ether (TAME) : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3/31/2006      | Toluene : RfD and RfC were revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3/31/2006      | Chemicals added this year : Hydrocaproic acid, 6-, Monocrotophos, Nonylphenol ethoxylate, Prothiofos, Sodium hypochlorite, Sulprofos, Tert-amyl-ethyl ether (TAEF), Tetrachlorvinphose (Stirophos), Tetraethyl pyrophosphate (TEPP)                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3/21/2005      | Boron : Carcinogenic classification and RfD were revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3/21/2005      | Cobalt : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3/21/2005      | Dioxane, 1,4-: RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 3/21/2005      | Ethylene dibromide : Sfo, and URF were revised. RfD and RfC were added.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3/21/2005      | Perchlorate : RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3/21/2005      | Chemicals added this year : Acetate, 2-ethoxyethanol, Acetate, isoamyl, Acetate, isobutyl, Acetate, sec-butyl, Benzenedicarbonitrile, 1,3-, Benzo-j-fluoranthene, Benzophenone, Benzoyl peroxide, Bromacil, Butadiene, 2-methyl-1,3- (isoprene), Butane, 2,3-dimethyl-, Butanol, 2-, Butanol, 2-methyl-2-, Butene, 1-, Butene, cis-2-, Butene, trans-2-, Cyclopentane, methyl-, Dibenzo(a,e)pyrene, Dibenzo(a,h)pyrene, Dibenzo(a,i)pyrene, Dichlorimid, Dichlorofluoromethane, Dipropylene glycol, Hexanal, 2-ethyl-, Hydroquinone, Isoamyl alcohol, Isodecanol, Pentane, 2-methyl-, Pentane, 3-methyl-, Pentanol, 1-, Pentanol, 4-methyl-2-, Phenol, 4-tert-butyl-, Phenothiazine, and Tetraethylene glycol. |
| 3/31/2004      | Acetone : RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3/31/2004      | Acrolein : RfD and carcinogenic classification were revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3/31/2004      | Adipic acid : RfD was revised; RfC was removed; RS-ESL was added.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 3/31/2004      | Benzene : RfD and RfC were revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3/31/2004      | Cyclohexane : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3/31/2004      | Diisopropyl ether : RS-ESL was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3/31/2004      | Disodium Iminodiacetate : RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3/31/2004      | Methyl Ethyl Ketone : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 3/31/2004      | Methyl isobutyl ketone : RfC was added (previously used a RS-ESL).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 3/31/2004      | MTBE : reference for toxicity factors was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 3/31/2004      | Nickel : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3/27/2003      | Table containing K <sub>oc</sub> values for ionizing organic COCs as a function of pH was added.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3/27/2003      | Adipic acid : RfD was revised; RfC was added; RS-ESL was removed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 3/27/2003      | Aminobiphenyl, 4- :Sfo was revised; RfD and URF were removed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3/27/2003      | Ammonium sulfate entry was changed to ammonium salts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 3/27/2003      | Aniline : RfD was added.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 3/27/2003      | Arsenic : refer to TRRP website for November 12, 2002 memorandum regarding implementation of new MCL.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 3/27/2003      | Bis (2-chloroethoxy) methane : Sfo and URF were revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 3/27/2003      | Boron : RfC was added.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 3/27/2003      | Nitrosopiperidine, N: carcinogenic classification was revised.                                                                                                                                                                                                                                                                                                                                                                            |
| 3/27/2003      | Perylene : RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3/27/2003      | Phenol : RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3/27/2003      | Picloram : reference for RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3/27/2003      | Safarole : carcinogenic classification was revised.                                                                                                                                                                                                                                                                                                                                                                                       |
| 3/27/2003      | Tetrachloroethylene : reference for carcinogenic classification was revised.                                                                                                                                                                                                                                                                                                                                                              |
| 3/27/2003      | Toluenediamine, 2,6: LogKoc was revised.                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3/27/2003      | Trichloroethylene : reference for carcinogenic classification was revised.                                                                                                                                                                                                                                                                                                                                                                |
| 3/27/2003      | Uranium : MCL was revised.                                                                                                                                                                                                                                                                                                                                                                                                                |
| 3/27/2003      | Valeric acid : RfD and RfC were revised.                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3/27/2003      | Xylenes : RfD was revised; RfC was added (previously used a RS:ESL).                                                                                                                                                                                                                                                                                                                                                                      |
| 3/28/2002      | References for some tox values were revised.                                                                                                                                                                                                                                                                                                                                                                                              |
| 3/28/2002      | Arsenic : MCL was revised. Note that this change is significant enough for the executive director to require use of the new arsenic MCL, even if the SIN or RAP has already been submitted.                                                                                                                                                                                                                                               |
| 3/28/2002      | Nitrophenol, 3: RS-ESL was revised.                                                                                                                                                                                                                                                                                                                                                                                                       |
| 3/28/2002      | Triaminotrinitrobenzene - H. unitless was corrected to reflect a value.                                                                                                                                                                                                                                                                                                                                                                   |
| 12/19/2001     | Several compounds were added to the tables which are not of human health concern but for which other criteria may apply. These are noted in the tables and an additional information table is referenced.                                                                                                                                                                                                                                 |
| 12/19/2001     | Ammonia : taste and odor value for groundwater was added to the secondary MCL column.                                                                                                                                                                                                                                                                                                                                                     |
| 12/19/2001     | Benzaldehyde : RS-ESL was revised.                                                                                                                                                                                                                                                                                                                                                                                                        |
| 12/19/2001     | Bis (2-chloroethoxy) methane : chemical/physical parameters were added.                                                                                                                                                                                                                                                                                                                                                                   |
| 12/19/2001     | Chlordane, gamma : chemical/physical parameters were added.                                                                                                                                                                                                                                                                                                                                                                               |
| 12/19/2001     | Chloroform : SFo was removed.                                                                                                                                                                                                                                                                                                                                                                                                             |
| 12/19/2001     | Chloromethane : RfC and carcinogenic classification were revised.                                                                                                                                                                                                                                                                                                                                                                         |
| 12/19/2001     | Cyclohexane : RS-ESL was revised.                                                                                                                                                                                                                                                                                                                                                                                                         |
| 12/19/2001     | Diethylene glycol monobutyl ether : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                      |
| 12/19/2001     | Hexachlorocyclopentadiene : RfD, RfC, and carcinogenic classification were revised.                                                                                                                                                                                                                                                                                                                                                       |
| 12/19/2001     | Methyl acetate : RfD was revised.                                                                                                                                                                                                                                                                                                                                                                                                         |
| 12/19/2001     | Methyl cyclohexane : RfC was revised.                                                                                                                                                                                                                                                                                                                                                                                                     |
| 12/19/2001     | Perchlorate : RfD was revised. Note that this change is significant enough for the executive director to require use of the new perchlorate RfD, even if the SIN or RAP has already been submitted.                                                                                                                                                                                                                                       |
| 12/19/2001     | Quinoline : Carcinogenic classification and SFo were revised.                                                                                                                                                                                                                                                                                                                                                                             |
| 12/19/2001     | Triaminotrinitrobenzene : chemical/physical parameters were revised.                                                                                                                                                                                                                                                                                                                                                                      |
| 3/15/2001      | Please note that several COCs were added to the tables. New COCs added since the last publication of the tables are identified in the chemical/physical properties table and the ABS.d/ABS.qi table.                                                                                                                                                                                                                                      |
| 3/15/2001      | Based on conversations with ATSDR, it was determined that the MRL list provided on ATSDR's website ( <a href="http://www.atsdr.cdc.gov/mrls.html">http://www.atsdr.cdc.gov/mrls.html</a> ) lists official, more up-to-date MRLs than the May 23, 1996 FR version which were previously used for the tables. Many of the toxicity factors additions and revisions noted below were due to transitioning to this new source for MRL values. |
| 3/15/2001      | The reference to the 1995 MADEP document was removed and replaced by TNRCC-derived values. This only affected the RfD for one noncarcinogenic PAH (2-methylnaphthalene), which is noted below.                                                                                                                                                                                                                                            |
| 3/15/2001      | Acetaldehyde : RfD was added.                                                                                                                                                                                                                                                                                                                                                                                                             |
| 3/15/2001      | Benzene : SFo was revised.                                                                                                                                                                                                                                                                                                                                                                                                                |

**Last Revised: February 6, 2025**

| <b>Summary of Updates to the Tables Accompanying the Texas Risk Reduction Program (TRRP) Rule<sup>1</sup></b> |                                                                                                                                                                                                                                                                                                                                                    |

| 3/15/2001                                                                                                     | Ethyl-2-methyl benzene, 1- and ethyl-4-methyl benzene, 1- MCLs were removed (had previously used toluene's MCL).                                                                                                                                                                                                                                   |
| 3/15/2001                                                                                                     | Formaldehyde : RfC was added (previously used a RS-ESL).                                                                                                                                                                                                                                                                                           |
| 3/15/2001                                                                                                     | Hexachlorocyclohexane, alpha : RfD was added.                                                                                                                                                                                                                                                                                                      |
| 3/15/2001                                                                                                     | Hexanone, 2: chemical/physical parameters were added.                                                                                                                                                                                                                                                                                              |
| 3/15/2001                                                                                                     | Kepone : Sfo and URF were added.                                                                                                                                                                                                                                                                                                                   |
| 3/15/2001                                                                                                     | Mercury: Tier 2 PCLs for site-specific soils with a pH $\geq$ 6.8 were provided for convenience in accordance with 350.73(f)(1). Persons should use the Tier 1 pH 4.9-based PCLs unless a site-specific soil pH $\geq$ 6.8 is demonstrated with site-specific soil samples. LogKd was revised to match Figure: 30 TAC §350.73(f) of the TRRP rule. |
| 3/15/2001                                                                                                     | Methylnaphthalene, 1: RfD was revised.                                                                                                                                                                                                                                                                                                             |
| 3/15/2001                                                                                                     | Methylnaphthalene, 2: RfD was revised.                                                                                                                                                                                                                                                                                                             |
| 3/15/2001                                                                                                     | MTBE : Sfo was revised.                                                                                                                                                                                                                                                                                                                            |
| 3/15/2001                                                                                                     | Naled : Dair value was added.                                                                                                                                                                                                                                                                                                                      |
| 3/15/2001                                                                                                     | Nickel : RfC was added.                                                                                                                                                                                                                                                                                                                            |
| 3/15/2001                                                                                                     | Nitrate : LogKoc and Henry's Law Constant were added.                                                                                                                                                                                                                                                                                              |
| 3/15/2001                                                                                                     | Nitroaniline, 3- and nitroaniline, 4: chemical/physical parameters were revised.                                                                                                                                                                                                                                                                   |
| 3/15/2001                                                                                                     | Nitrophenol, 2- and nitrophenol, 4: RS-ESLs were added; chemical/physical parameters were revised.                                                                                                                                                                                                                                                 |

| Summary of Updates to the Tables Accompanying the Texas Risk Reduction Program (TRRP) Rule <sup>1</sup> |                                                                                                                      |
|---------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Date of Change                                                                                          | Change Made                                                                                                          |
| 3/15/2001                                                                                               | t (exposure interval) was corrected to match Figure: 30 TAC §350.75(b)(1) of the TRRP rule (value changed slightly). |
| 3/15/2001                                                                                               | Tetrachloroethane, 1,1,2,2: RfD was revised.                                                                         |
| 3/15/2001                                                                                               | Tetraethyl lead was removed as a COC for the vegetable ingestion pathway (was previously considered to be a metal).  |
| 3/15/2001                                                                                               | Tetrahydrofuran : chemical/physical parameters were revised.                                                         |
| 3/15/2001                                                                                               | Thallium : LogKd was added.                                                                                          |
| 3/15/2001                                                                                               | Toluenediamine, 2,6: LogKoc was added.                                                                               |
| 3/15/2001                                                                                               | Trimethylbenzene, 1,2,3: MCL was removed (had previously used toluene's MCL).                                        |
| 3/15/2001                                                                                               | Uranium : RfC was added.                                                                                             |
| 3/15/2001                                                                                               | Vinyl chloride : SFo, RfD, URF, and RfC were revised.                                                                |
| 9/16/1999                                                                                               | Original TRRP tables available.                                                                                      |

**Footnote**

**1** As discussed in TRRP §350.73(a) and in the accompanying guidance document entitled Toxicity Factors and Chemical/Physical Parameters (RG-366/TRRP-19), persons are required to use the most current toxicity factors as of the date of submittal of the Self-Implementation Notice (SIN) or the Response Action Plan (RAP). The TCEQ provides toxicity factors on the agency's website as a convenience to users of the tables. However, since the tables are typically updated on an annual basis, it is the person's responsibility to ensure that they are using the most current toxicity factors according to the heirarchy described in §350.73(a). TCEQ project managers will verify that toxicity factors are current at the time of submittal of the SIN or RAP. Note that if the executive director determines during the review of the Response Action Completion Report (RACR) that a change in a toxicity factor since the submittal of the SIN or RAP has been of such a magnitude that the PCLs previously developed for a COC would clearly not be protective of human health and the environment, the adequacy of the response action must be reevaluated.

This table contains a list of all edits and additions to the TRRP PCL tables since 1999  
end of worksheet

**Footnotes**

1 In accordance with §350.72(b), when establishing Tier 1 PCLs for individual COCs for each of the individual and combined human health exposure pathways, the person must evaluate whether the PCLs need to be adjusted to lower concentrations to meet the cumulative carcinogenic risk level and hazard index criteria specified in §350.72(c). For COCs which exhibit both carcinogenic and noncarcinogenic characteristics, they shall be evaluated as both a carcinogen and noncarcinogen when determining whether the PCL established for an individual COC for each of the individual and combined human health exposure pathways needs to be adjusted to a lower concentration to meet the cumulative risk and hazard criteria. The person shall then use the lower of the carcinogenic or noncarcinogenic PCL as the Tier 1 human health PCL. In other words, the Tier 1 PCLs provided in this table for an individual COC should not be used as the final Tier 1 human health PCL for any of the individual or combined exposure pathways in cases where there are more than 10 carcinogenic and/or more than 10 noncarcinogenic COCs within a source medium unless it can be demonstrated that further downward adjustment is not necessary to meet the cumulative risk and hazard criteria.

2 Combined includes inhalation; ingestion; dermal pathways

3 c = carcinogenic; n = noncarcinogenic; m = primary MCL-based; e = EPA Action Level-based; > S = solubility limit exceeded during calculation

4 For subsurface soils only

5 Site-specific PCLs for mercury may vary based on the pH-dependent Kd value (see Figure: 30 TAC §350.73(f)(1)(C)). Persons should use the Tier 1 pH 4.9-based PCLs unless a site-specific soil pH > 6.8 is demonstrated with site-specific soil samples.

6 Persons must use the value provided in the "GWSoil for Secondary MCL" column of this table as the "GWSoil PCL for MTBE if the conditions described in §350.74(f)(3) exist.

7 Please see the note on nitrate/nitrite in the "List of Updates" spreadsheet for March 31, 2017.

8 This chemical is one of four chemicals that make up total trihalomethanes (TTHMs). USEPA has established an MCL for TTHMs of 0.08 mg/L. Each individual chemical that contributes to TTHMs must meet the 0.08 mg/L based GWSoil<sub>ing</sub> PCL, and the person must ensure that the total soil concentrations for all four will not impact groundwater above the GWGWing based MCL.

9 Nitrate, nitrite, and ammonia are inorganic anions that are mobile in most environmental situations, quickly partitioning from soil to groundwater. Due to these partitioning characteristics it is difficult to calculate a reliable soil-water partition coefficient (Kd) and Henry's law constant (H') for these compounds. The Kd and H' are parameters that are required to calculate the GWSoil<sub>ing</sub> PCL in accordance with 30 TAC 350.75(b)(1) using the Tier 1 GWSoil<sub>ing</sub> PCL equation.

\* These compounds are not necessarily of concern from a human health standpoint, therefore calculation of human health-based values is not required. However, aesthetics and ecological criteria would still apply. See table entitled "Compounds for which Calculation of a Human Health PCL is Not Required" available on the TCEQ website at <http://www.tceq.state.tx.us/remediation/trrp/trrp.html>.

| <b>*</b> These compounds are not necessarily of concern from a human health standpoint, therefore calculation of human health-based values is not required. However, aesthetics and ecological criteria would still apply. See table entitled "Compounds for which Calculation of a Human Health |     |                                                     |                   |                                                        |                   |                                                                |                   |                                                               |                   |                                                     |                   |                                                        |                   |                                                                |                   |                                                               |                   |                                   |
