| 1 Site-specific PCLs for mercury may vary based on the pH-dependent Kd value (see Figure:30 TAC §350.73(f)(1)(C)). Persons should use the Tier 1 pH 4.9-based PCLs unless a site-specific soil pH > 6.8 is demonstrated with site-specific soil samples.                                                                                                                                                                                                                      |           |                                                                                             |                                                    |                                                |                                                   |
| * These compounds are not necessarily of concern from a human health standpoint, therefore calculation of human health-based values is not required. However, aesthetics and ecological criteria would still apply. See table entitled "Compounds for which Calculation of a Human Health PCL is Not Required" available on the TCEQ website at <a href="http://www.tceq.state.tx.us/remediation/trrp/trrp.html">http://www.tceq.state.tx.us/remediation/trrp/trrp.html</a> . |           |                                                                                             |                                                    |                                                |                                                   |

| <b>2</b> Site-specific PCLs for mercury may vary based on the pH-dependent Kd value (see Figure:30 TAC §350.73(f)(1)(C)). Persons should use the Tier 1 pH 4.9-based PCLs unless a site-specific soil pH > 6.8 is demonstrated with site-specific soil samples.                                                                                                                                                                                                               |     |                                                                              |                                                                             |                                    |                                     |                                   |                                                                             |                                                                            |                                                                              |                                                                             |                                    |                                     |                                   |                                                                             |                                                                            |
| * These compounds are not necessarily of concern from a human health standpoint, therefore calculation of human health-based values is not required. However, aesthetics and ecological criteria would still apply. See table entitled "Compounds for which Calculation of a Human Health PCL is Not Required" available on the TCEQ website at <a href="http://www.tceq.state.tx.us/remediation/trrp/trrp.html">http://www.tceq.state.tx.us/remediation/trrp/trrp.html</a> . |     |                                                                              |                                                                             |                                    |                                     |                                   |                                                                             |                                                                            |                                                                              |                                                                             |                                    |                                     |                                   |                                                                             |                                                                            |
