Good afternoon, Mr. Jaini:

The TCEQ has evaluated your request to extend the enforcement discretion (due to COVID-19 related challenges) previously approved on December 8, 2020, which is currently valid through March 31, 2021.

This enforcement discretion relates to performance testing of emission point numbers 26-CS (26.1 Hydrotreater heater), 29.1-36-001 (Vacuum Distillation Unit, Heater), 29.2-CS (Coker Heater), 28.2-36-2 (Unit 28.2 SRU), 38-36-252 (Stripper Reboiler Heater) as required by Special Condition 18 of Permit 5920A. In addition, this discretion will also be applicable for emission point number 39.1-95-118.

The TCEQ will extend this enforcement discretion until September 30, 2021 or until the emissions points resume at adequate firing/production rates, whichever comes first. The required tests shall be completed as soon as practicable, as conditions allow, by this date.

Please maintain records adequate to document activities related to any noncompliance under enforcement discretion, including details of Phillips 66 best efforts to comply.

Regards,

Jonathan Walling, Area Director
Coastal & East Texas Area
Texas Commission on Environmental Quality

Jonathan/Mark,

Again, we are operating at reduced rates as Covid has impacted our business. We are requesting another extension. In the event that we are running at full rate, we will proceed to testing promptly. If you have any questions, please call me at (979)491-2125.

Customer Reference Number CN604065912
Acct BL-0042-G

Dear Mr. Walling:

We are resubmitting our compliance demonstration extension request until the end of third quarter of 2021. Phillips 66 previously submitted a November 25, 2020 written extension for compliance demonstration for several combustion sources due to demand being negatively impacted by COVID. We were granted extension until the end of first quarter of 2021. As of this writing, we continue to be negatively impacted by lack of demand due to COVID. We are requesting permission for extension for the following sources (EPNs) impacted by our current negatively impacted demand:

- EPN 26-CS
- EPN 29.1-36-001
- EPN 29.2-CS
- EPN 28.2-36-2
- EPN 38-36-252
- EPN 39.1-95-118

Since we restarted Unit 3, we have completed Unit 3 (EPN 3-95-3) stack testing on February 3, 2021. In the event that demand returns, we will make the notifications and proceed to start stack testing.

If you have any questions, please call Vinod Jaini at (979)491-2125 or Luke Liu at (979)491-2638.

A handwritten signature in blue ink, appearing to read "Vivek Gopal".
