#### TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

# ORDER suspending water rights on the Brazos River

The Executive Director of the Texas Commission on Environmental Quality received a senior priority call from Dow Chemical Company (Dow), on November 14, 2012. Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes at a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976.

#### FINDINGS OF FACT

Having considered the facts provided by Dow, staff investigations and review, and public information, the Executive Director makes the following Findings of Fact and Conclusions of Law:

- Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes at a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976. Dow's certificate also includes additional authorizations for storage in off-channel reservoirs and diversions from the San Jacinto-Brazos Coastal Basin.
- 2. Dow is currently unable to divert the amount of water it needs and that is authorized under its water rights due to low flow in the river.
- 3. Dow has a need for and can beneficially use increased amounts of water in the river that result from suspending upstream junior water rights.
- 4. Seventy-five percent of the watershed at or above the senior call location is in at least moderate drought as classified by the National Drought Mitigation Center. The 33rd percentile flow at U. S. Geological Survey gaging station 08116650, Brazos River near Rosharon, Texas, based on a period of record from April 1, 1967 to present is 1,610 cfs. Average streamflow for the period October 12, 2012 to November 12, 2012 was 535 cfs. Average streamflow for the week of November

- 5, 2012 to November 11, 2012 was 264 cfs. Therefore, the watershed at Dow's diversion point is in a "drought" as defined in 30 Tex. Admin. Code § 36.2(3).
- 5. Under 30 TAC 297.58(b), if a water right has appropriations with different priority dates, water shall be credited against the oldest priority date first.
- 6. Based on water use information submitted by Dow and Brazosport Water Authority, Dow has used 84,898 acre feet of its authorized water. Therefore, the priority date of Dow's call is February 14, 1942. Dow indicates its current consumptive demand is 225 cfs and it has 41 days of reservoir storage.
- 7. There are several water rights, excluding those for municipal use or power generation, upstream of Dow's Permit that are junior in priority to February 14, 1942. These rights are listed in Appendix A of this Order, which is incorporated in this Order and is part of this Order.
- 8. Appendix B, which is incorporated into this Order and is part of this Order, lists the counties that are covered by the junior water rights being suspended.
- 9. There are several junior water rights that are for municipal use or power generation upstream of Dow. The Executive Director has determined that these rights should not be suspended at this time due to concerns about public health, safety and welfare. These water rights are listed in Appendix C, which is incorporated into this Order and is part of this Order.
- 10. Attachment D lists those water right holders with authorizations for non-exempt domestic use. These water rights are not being suspended for the same reasons described in Finding of Fact No. 9. This Appendix is incorporated in this Order and is part of this Order.
- 11. If the water rights in Finding of Fact No. 7 are suspended as described above, the resulting change in streamflow conditions should allow Dow to divert some of the water that these water rights do not take. This is an amount that could be beneficially used by Dow for municipal and industrial purposes.
- This suspension order maximizes the beneficial use of water, minimizes the impact on water rights holders, prevents the waste of water, conforms to the order of preferences established by the Texas Water Code § 11.024 to the greatest extent practicable, considers the efforts of the affected water right holders to develop and implement the water conservation plans and drought contingency plans required by Tex. Water Code Chapter 11, and does not require the release of water that is lawfully stored in a reservoir under a valid water right.

#### CONCLUSIONS OF LAW

- 1. Based on the priority doctrine in Tex. Water Code § 11.027, Dow has a right to call on water rights that are junior to it if the call is not futile.
- 2. Based on Findings of Fact Nos. 2, 3, 6, and 11, due to low flows Dow is unable to take water it is authorized to take under its permit, and suspending the water rights in this order may result in water Dow can beneficially use.

- 3. Based on Finding of Fact No. 4, the Brazos River in the watershed above Dow's diversion point is in a drought as defined by 30 Tex. Admin. Code § 36.2(3).
- 4. This Suspension Order meets the requirements of Tex. Water Code § 11.053.
- 5. The junior water rights in Appendix A should be suspended.
- 6. The junior water rights in Appendix C, are municipal and power generation water rights that the Executive Director has determined should not be suspended at this time due to concerns about public health, safety and welfare.
- 7. The junior water rights in Appendix D authorize non-exempt domestic use and should not be suspended at this time due to concerns about public health, safety and welfare.
- 8. This Order constitutes notice of the hearing to affected water right holders required by 30 Tex. Admin. Code § 36.8.

Now, therefore, be it ordered by the Executive Director of the Texas Commission on Environmental Quality that:

- 1. The water rights listed in Appendix A are suspended for 180 days.
- 2. This order shall be in effect for 180 days from the date of issuance.
- 3. This order may be extended once for 90 days.
- 4. This order is subject to modification or termination by the Executive Director based on changed conditions. Changed conditions include, but are not limited to, notification by Dow that Dow is rescinding or withdrawing its call, or the Executive Director has information that the call is no longer needed due to higher streamflow, or conditions in the watershed no longer meet the definition of "drought."
- 5. Dow shall notify the Executive Director immediately if its need for water can be met without the suspensions. If Dow notifies the Executive Director in writing that it rescinds or withdraws its call, this Order automatically terminates upon receipt by the Executive Director.
- 6. The commission will hold a hearing to determine whether to affirm, modify, or set aside this Executive Director order on December 5, 2012 at the Texas Commission Environmental Quality, 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas.
