

The Texas Commission on Environmental Quality (TCEQ, agency, or commission) proposes an amendment to §336.357.

### **Background and Summary of the Factual Basis for the Proposed Rule**

The commission proposes changes to Chapter 336, Subchapter D, that would revise the commission's rules concerning physical protection of category 1 and category 2 quantities of radioactive materials to ensure compatibility with federal regulations promulgated by the Nuclear Regulatory Commission (NRC), which is necessary to preserve the status of Texas as an Agreement State under Title 10 Code of Federal Regulations (CFR) Part 150 and under the "Articles of Agreement between the United States Atomic Energy Commission and the State of Texas for Discontinuance of Certain Commission Regulatory Authority and Responsibility Within the State Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended." Rules which are designated by NRC as compatibility items must be adopted by an Agreement State within three years of the effective date of the NRC rules, in most cases.

### **Section Discussion**

The commission proposes administrative changes throughout this rulemaking to be consistent with *Texas Register* requirements and agency rules and guidelines.

*§336.357, Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material*

The commission proposes to amend the requirements regarding physical protection of category 1 and category 2 quantities of radioactive materials in §336.357(j).

The commission proposes to amend §336.357(e)(3)(A) and §336.357(e)(3)(B) to update the contact information for the NRC to ensure compatibility with federal regulations promulgated by the NRC.

The commission proposes to amend §336.357(j)(4)(B), §336.357(j)(4)(C), §336.357(j)(4)(C)(i), §336.357(j)(4)(E), §336.357(j)(4)(F), §336.357(j)(4)(G), and §336.357(j)(4)(H)(ii) to add "list of individuals that have been approved for unescorted access" to the list of information for which access must be controlled. These rule amendments are proposed to ensure compatibility with federal regulations promulgated by the NRC.

The commission proposes to amend §336.357(u)(1)(A) to update the name for a specific NRC division to ensure compatibility with federal regulations promulgated by the NRC.

**Fiscal Note: Costs to State and Local Government**

Jené Bearse, Analyst in the Budget and Planning Division, has determined that for the first five-year period the proposed rules are in effect, no fiscal implications are anticipated for the agency or for other units of state or local government as a result of

administration or enforcement of the proposed rule.

### **Public Benefits and Costs**

Ms. Bears determined that for each year of the first five years the proposed rules are in effect, the public benefit anticipated would be compliance with federal regulations promulgated by the Nuclear Regulatory Commission. The proposed rulemaking is not anticipated to result in fiscal implications for businesses or individuals.

### **Local Employment Impact Statement**

The commission reviewed this proposed rulemaking and determined that a Local Employment Impact Statement is not required because the proposed rulemaking does not adversely affect a local economy in a material way for the first five years that the proposed rule is in effect.

### **Rural Communities Impact Assessment**

The commission reviewed this proposed rulemaking and determined that the proposed rulemaking does not adversely affect rural communities in a material way for the first five years that the proposed rules are in effect. The amendments would apply statewide and have the same effect in rural communities as in urban communities.

### **Small Business and Micro-Business Assessment**

No adverse fiscal implications are anticipated for small or micro-businesses due to the

implementation or administration of the proposed rule for the first five-year period the proposed rules are in effect.

### **Small Business Regulatory Flexibility Analysis**

The commission reviewed this proposed rulemaking and determined that a Small Business Regulatory Flexibility Analysis is not required because the proposed rule does not adversely affect a small or micro-business in a material way for the first five years the proposed rules are in effect.

### **Government Growth Impact Statement**

The commission prepared a Government Growth Impact Statement assessment for this proposed rulemaking. The proposed rulemaking does not create or eliminate a government program and will not require an increase or decrease in future legislative appropriations to the agency. The proposed rulemaking does not require the creation of new employee positions, eliminate current employee positions, nor require an increase or decrease in fees paid to the agency. The proposed rulemaking does not create, expand, repeal, or limit an existing regulation, nor does the proposed rulemaking increase or decrease the number of individuals subject to its applicability. During the first five years, the proposed rule should not impact positively or negatively the state's economy.

### **Draft Regulatory Impact Analysis Determination**

The commission proposes the rulemaking action under the regulatory analysis requirements of Texas Government Code, §2001.0225, and determined that the action is not subject to Texas Government Code, §2001.0225 because it does not meet the definition of a “Major environmental rule” as defined in the statute. A “Major environmental rule” means a rule, the specific intent of which, is to protect the environment or reduce risks to human health from environmental exposure and that may adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, or the public health and safety of the state or a sector of the state. The proposal to Chapter 336 is not anticipated to adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, or the public health and safety of the state or a sector of the state, because these revisions are required for the TCEQ to maintain compatibility with the NRC for these licensing programs. Furthermore, the proposed rulemaking action does not meet any of the four applicability requirements listed in Texas Government Code, §2001.0225(a). Texas Government Code, §2001.0225, only applies to a major environmental rule, the result of which is to: 1) exceed a standard set by federal law, unless the rule is specifically required by state law; 2) exceed an express requirement of state law, unless the rule is specifically required by federal law; 3) exceed a requirement of a delegation agreement or contract between the state and an agency or representative of the federal government to implement a state and federal program; or 4) adopt a rule solely under the general powers of the agency

instead of under a specific state law. The proposed rulemaking action does not exceed a standard set by federal law, an express requirement of state law, a requirement of a delegation agreement, nor does it adopt a rule solely under the general powers of the agency.

Texas Health and Safety Code (THSC), Chapter 401, authorizes the commission to regulate the disposal of most radioactive substances in Texas. THSC, §§401.051, 401.103, 401.104, and 401.412 authorize the commission to adopt rules for the control of sources of radiation and the licensing of the disposal of radioactive substances. In addition, Texas is an "Agreement State" authorized by the NRC to administer a radiation control program under the Atomic Energy Act of 1954, as amended (Atomic Energy Act). The proposed rules are compatible with federal law.

The proposed rules do not exceed an express requirement of state law. THSC, Chapter 401, establishes general requirements, including requirements for public notices, for the licensing and disposal of radioactive substances, source material recovery, and commercial radioactive substances storage and processing. The proposed rules are compatible with a requirement of a delegation agreement or contract between the state and an agency of the federal government. Texas has been designated as an "Agreement State" by the NRC under the authority of the Atomic Energy Act. The Atomic Energy Act requires that the NRC find that the state radiation control program is compatible with the NRC requirements for the regulation of radioactive materials and is adequate

to protect health and safety. Under the Agreement Between the United States Nuclear Regulatory Commission and the State of Texas for Discontinuance of Certain Commission Regulatory Authority and Responsibility Within the State Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended by the Low Level Radioactive Waste Policy Act Amendments (LLRWPA), 42 USC 2021.

The commission invites public comment regarding the Draft Regulatory Impact Analysis Determination during the public comment period. Written comments on the Draft Regulatory Impact Analysis Determination may be submitted to the contact person at the address listed under the Submittal of Comments section of this preamble.

### **Takings Impact Assessment**

The commission evaluated this proposed rulemaking and performed a preliminary assessment of whether the Private Real Property Rights Preservation Act, Texas Government Code, Chapter 2007 is applicable. The commission's preliminary assessment indicates that the Private Real Property Rights Preservation Act does not apply to this proposed rulemaking because it is an action reasonably taken to fulfill an obligation mandated by federal law. The commission further evaluated this proposed rulemaking and performed a preliminary assessment of whether these proposed rules constitute a taking under Texas Government Code, Chapter 2007. Promulgation and enforcement of this proposed rulemaking would be neither a statutory nor a

constitutional taking of private real property. The proposed rules do not affect a landowner's rights in private real property because this rulemaking action does not constitutionally burden, nor restrict or limit, the owner's right to property and reduce its value by 25% or more beyond which would otherwise exist in the absence of the regulations.

### **Consistency with the Coastal Management Program**

The commission reviewed the proposed rules and found that they are neither identified in Coastal Coordination Act implementation rules, 31 TAC §505.11(b)(2) or (4), nor will they affect any action/authorization identified in Coastal Coordination Act implementation rules, 31 TAC §505.11(a)(6). Therefore, the proposed rules are not subject to the Texas Coastal Management Program.

Written comments on the consistency of this rulemaking may be submitted to the contact person at the address listed under the Submittal of Comments section of this preamble.

### **Announcement of Hearing**

The commission will hold a virtual public hearing on this proposal on January 6, 2022, at 10:00 a.m. The hearing is structured for the receipt of oral or written comments by interested persons. Individuals may present oral statements when called upon in order of registration. Open discussion will not be permitted during the hearing; however,

commission staff members will be available to discuss the proposal 30 minutes prior to the hearing.

Individuals who plan to attend the hearing and want to provide oral comments and/or want their attendance on record must **register by January 5, 2022**. To register for the hearing, please email [Rules@tceq.texas.gov](mailto:Rules@tceq.texas.gov) and provide the following information: your name, your affiliation, your email address, your phone number, and whether or not you plan to provide oral comments during the hearing. Instructions for participating in the hearing will be sent on **January 5, 2022**, to those who register for the hearing.

For the public who do not wish to provide oral comments but would like to view the hearing may do so at no cost at:

[https://teams.microsoft.com/l/meetup-join/19%3ameeting\\_MzVlNTgwOTEtOWYxMi00ODc3LTliOGEtNmFiNDc1M2ZjN2Ux%40tHread.v2/0?context=%7b%22Tid%22%3a%22871a83a4-a1ce-4b7a-8156-3bcd93a08fba%22%2c%22Oid%22%3a%2230ec010b-ff0b-4618-bbc4-622a14f9cb18%22%2c%22IsBroadcastMeeting%22%3a%22true%7d&btype=a&role=a](https://teams.microsoft.com/l/meetup-join/19%3ameeting_MzVlNTgwOTEtOWYxMi00ODc3LTliOGEtNmFiNDc1M2ZjN2Ux%40tHread.v2/0?context=%7b%22Tid%22%3a%22871a83a4-a1ce-4b7a-8156-3bcd93a08fba%22%2c%22Oid%22%3a%2230ec010b-ff0b-4618-bbc4-622a14f9cb18%22%2c%22IsBroadcastMeeting%22%3a%22true%7d&btype=a&role=a)

Persons who have special communication or other accommodation needs should contact Sandy Wong, Office of Legal Services at (512) 239-1802 or 1-800-RELAY-TX (TDD). Requests should be made as far in advance as possible.

### **Submittal of Comments**

Written comments may be submitted to Cecilia Mena, Office of Legal Services, Texas Commission on Environmental Quality, P.O. Box 13087, Austin, Texas 78711-3087, or faxed to [fax4808@tceq.texas.gov](mailto:fax4808@tceq.texas.gov). Electronic comments may be submitted at: <https://www6.tceq.texas.gov/rules/ecomments/>. File size restrictions may apply to comments being submitted via the eComments system. All comments should reference Rule Project Number 2021-026-336-WS. The comment period closes on January 10, 2022. Please choose one of the methods provided to submit your written comments.

Copies of the proposed rulemaking can be obtained from the commission's website at [https://www.tceq.texas.gov/rules/propose\\_adopt.html](https://www.tceq.texas.gov/rules/propose_adopt.html). For further information, please contact Hans Weger, Radioactive Materials Section, (512) 239-6465.

## **SUBCHAPTER D: STANDARDS FOR PROTECTION AGAINST RADIATION**

### **§336.357**

#### **Statutory Authority**

The rule is proposed under the Texas Radiation Control Act (TRCA), Texas Health and Safety Code (THSC), Chapter 401; THSC, §401.011, which provides the commission authority to regulate and license the disposal of radioactive substances, the commercial processing and storage of radioactive substances, and the recovery and processing of source material; THSC, §401.051, which authorizes the commission to adopt rules and guidelines relating to control of sources of radiation; THSC, §401.103, which authorizes the commission to adopt rules and guidelines that provide for licensing and registration for the control of sources of radiation; THSC, §401.104, which requires the commission to provide rules for licensing for the disposal of radioactive substances; and THSC, §401.106, which authorizes the commission to adopt rules to exempt a source of radiation from the licensing requirements provided by the TRCA. The rule is proposed as authorized by Texas Water Code (TWC), §5.103, which provides the commission with the authority to adopt rules necessary to carry out its powers and duties under the TWC and other laws of the state.

The proposed amendments implement THSC, Chapter 401, and are proposed to meet compatibility standards set by the United States Nuclear Regulatory Commission.

**§336.357. Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material.**

(a) Specific exemption. A licensee that possesses radioactive waste that contains category 1 or category 2 quantities of radioactive material is exempt from the requirements of subsections (b) - (w) of this section. However, any radioactive waste that contains discrete sources, ion-exchange resins, or activated material that weighs less than 2,000 kilograms (4,409 pounds) is not exempt from the requirements of subsections (b) - (w) of this section. The licensee shall implement the following requirements to secure the radioactive waste:

(1) use continuous physical barriers that allow access to the radioactive waste only through established access control points;

(2) use a locked door or gate with monitored alarm at the access control point;

(3) assess and respond to each actual or attempted unauthorized access to determine whether an actual or attempted theft, sabotage, or diversion occurred;  
and

(4) immediately notify the local law enforcement agency (LLEA) and request an armed response from the LLEA upon determination that there was an actual or attempted theft, sabotage, or diversion of the radioactive waste that contains category 1 or category 2 quantities of radioactive material.

(b) Personnel access authorization requirements for category 1 or category 2 quantities of radioactive material.

(1) General.

(A) Each licensee that possesses an aggregated quantity of radioactive material at or above the category 2 threshold shall establish, implement, and maintain its access authorization program in accordance with the requirements of this subsection and subsections (c) - (h) of this section.

(B) An applicant for a new license and each licensee, upon application for modification of its license, that would become newly subject to the requirements of this subsection and subsections (c) - (h) of this section, shall implement the requirements of this subsection and subsections (c) - (h) of this section, as appropriate, before taking possession of an aggregated category 1 or category 2 quantity of radioactive material.

(C) Any licensee that has not previously implemented the Security Orders or been subject to the provisions of this subsection and subsections (c) - (h) of this section shall implement the provisions of this subsection and subsections (c) - (h) of this section before aggregating radioactive material to a quantity that equals or exceeds the category 2 threshold.

(2) General performance objective. The licensee's access authorization program must ensure that the individuals specified in paragraph (3)(A) of this subsection are trustworthy and reliable.

(3) Applicability.

(A) Licensees shall subject the following individuals to an access authorization program:

(i) any individual whose assigned duties require unescorted access to category 1 or category 2 quantities of radioactive material or to any device that contains the radioactive material; and

(ii) reviewing officials.

(B) Licensees need not subject the categories of individuals listed in subsection (f)(1) of this section to the investigation elements of the access authorization program.

(C) Licensees shall approve for unescorted access to category 1 or category 2 quantities of radioactive material only those individuals with job duties that require unescorted access to category 1 or category 2 quantities of radioactive material.

(D) Licensees may include individuals needing access to safeguards information-modified handling under 10 Code of Federal Regulations (CFR) Part 73, in the access authorization program under this subsection and subsections (c) - (h) of this section.

(c) Access authorization program requirements.

(1) Granting unescorted access authorization.

(A) Licensees shall implement the requirements of subsection (b) of this section, this subsection, and subsections (d) - (h) of this section for granting initial or reinstated unescorted access authorization.

(B) Individuals determined to be trustworthy and reliable shall also complete the security training required by subsection (j)(3) of this section before being allowed unescorted access to category 1 or category 2 quantities of radioactive material.

(2) Reviewing officials.

(A) Reviewing officials are the only individuals who may make trustworthiness and reliability determinations that allow individuals to have unescorted access to category 1 or category 2 quantities of radioactive materials possessed by the licensee.

(B) Each licensee shall name one or more individuals to be reviewing officials. After completing the background investigation on the reviewing official, the licensee shall provide under oath or affirmation, a certification that the reviewing official is deemed trustworthy and reliable by the licensee. The fingerprints of the named reviewing official must be taken by a law enforcement agency, Federal or State agencies that provide fingerprinting services to the public, or commercial fingerprinting services authorized by a State to take fingerprints. The licensee shall recertify that the reviewing official is deemed trustworthy and reliable every 10 years in accordance with subsection (d)(3) of this section.

(C) Reviewing officials must be permitted to have unescorted access to category 1 or category 2 quantities of radioactive materials or access to safeguards information or safeguards information-modified handling, if the licensee possesses safeguards information or safeguards information-modified handling.

(D) Reviewing officials cannot approve other individuals to act as reviewing officials.

(E) A reviewing official does not need to undergo a new background investigation before being named by the licensee as the reviewing official if:

(i) the individual has undergone a background investigation that included fingerprinting and a Federal Bureau of Investigations (FBI) criminal history records check and has been determined to be trustworthy and reliable by the licensee; or

(ii) the individual is subject to a category listed in subsection (f)(1) of this section.

(3) Informed consent.

(A) Licensees may not initiate a background investigation without the informed and signed consent of the subject individual. This consent must include authorization to share personal information with other individuals or organizations as necessary to complete the background investigation. Before a final adverse determination, the licensee shall provide the individual with an opportunity to correct any inaccurate or incomplete information that is found during the background investigation. Licensees do not need to obtain signed consent from those individuals that meet the requirements of subsection (d)(2) of this section. A signed consent must be obtained prior to any reinvestigation.

(B) The subject individual may withdraw his or her consent at any time. Licensees shall inform the individual that:

(i) if an individual withdraws his or her consent, the licensee may not initiate any elements of the background investigation that were not in progress at the time the individual withdrew his or her consent; and

(ii) the withdrawal of consent for the background investigation is sufficient cause for denial or termination of unescorted access authorization.

(4) Personal history disclosure. Any individual who is applying for unescorted access authorization shall disclose the personal history information that is required by the licensee's access authorization program for the reviewing official to make a determination of the individual's trustworthiness and reliability. Refusal to provide, or the falsification of, any personal history information required by subsection (b) of this section, this subsection, and subsections (d) - (h) of this section is sufficient cause for denial or termination of unescorted access.

(5) Determination basis.

(A) The reviewing official shall determine whether to permit, deny, unfavorably terminate, maintain, or administratively withdraw an individual's unescorted access authorization based on an evaluation of all of the information collected to meet the requirements of subsection (b) of this section, this subsection, and subsections (d) - (h) of this section.

(B) The reviewing official may not permit any individual to have unescorted access until the reviewing official has evaluated all of the information collected to meet the requirements of subsection (b) of this section, this subsection, and subsections (d) - (h) of this section and determined that the individual is trustworthy and reliable. The reviewing official may deny unescorted access to any

individual based on information obtained at any time during the background investigation.

(C) The licensee shall document the basis for concluding whether or not there is reasonable assurance that an individual is trustworthy and reliable.

(D) The reviewing official may terminate or administratively withdraw an individual's unescorted access authorization based on information obtained after the background investigation has been completed and the individual granted unescorted access authorization.

(E) Licensees shall maintain a list of persons currently approved for unescorted access authorization. When a licensee determines that a person no longer requires unescorted access or meets the access authorization requirements, the licensee shall remove the person from the approved list as soon as possible, but no later than [no-later-than] seven working days, and take prompt measures to ensure that the individual is unable to have unescorted access to the material.

(6) Procedures. Licensees shall develop, implement, and maintain written procedures for implementing the access authorization program. The procedures must include provisions for the notification of individuals who are denied unescorted access. The procedures must include provisions for the review, at the request of the

affected individual, of a denial or termination of unescorted access authorization. The procedures must contain a provision to ensure that the individual is informed of the grounds for the denial or termination of unescorted access authorization and allow the individual an opportunity to provide additional relevant information.

(7) Right to correct and complete information.

(A) Prior to any final adverse determination, licensees shall provide each individual subject to subsection (b) of this section, this subsection, and subsections (d) - (h) of this section with the right to complete, correct, and explain information obtained as a result of the licensee's background investigation. Confirmation of receipt by the individual of this notification must be maintained by the licensee for a period of one year from the date of the notification.

(B) If, after reviewing his or her criminal history record, an individual believes that it is incorrect or incomplete in any respect and wishes to change, correct, update, or explain anything in the record, the individual may initiate challenge procedures. These procedures include direct application by the individual challenging the record to the law enforcement agency that contributed the questioned information or a direct challenge as to the accuracy or completeness of any entry on the criminal history record to the Federal Bureau of Investigation, Criminal Justice Information Services (CJIS) Division, ATTN: SCU, Mod. D-2, 1000 Custer Hollow Road,

Clarksburg, WV 26306, as set forth in 28 CFR §§16.30 - 16.34. In the latter case, the FBI will forward the challenge to the agency that submitted the data, and will request that the agency verify or correct the challenged entry. Upon receipt of an official communication directly from the agency that contributed the original information, the FBI Identification Division will make any changes necessary in accordance with the information supplied by that agency. Licensees must provide at least 10 days for an individual to initiate action to challenge the results of an FBI criminal history records check after the record is made available for his or her review. The licensee may make a final adverse determination based upon the criminal history records only after receipt of the FBI's confirmation or correction of the record.

(8) Records.

(A) The licensee shall retain documentation regarding the trustworthiness and reliability of individual employees for three years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material.

(B) The licensee shall retain a copy of the current access authorization program procedures as a record for three years after the procedure is no longer needed. If any portion of the procedure is superseded, the licensee shall retain the superseded material for three years after the record is superseded.

(C) The licensee shall retain the list of persons approved for unescorted access authorization for three years after the list is superseded or replaced.

(d) Background investigations.

(1) Initial investigation. Before allowing an individual unescorted access to category 1 or category 2 quantities of radioactive material or to the devices that contain the material, licensees shall complete a background investigation of the individual seeking unescorted access authorization. The scope of the investigation must encompass at least the seven years preceding the date of the background investigation or since the individual's eighteenth birthday, whichever is shorter. The background investigation must include at a minimum:

(A) fingerprintings and an FBI identification and criminal history records check in accordance with subsection (e) of this section;

(B) verification of true identity. Licensees shall verify the true identity of the individual applying for unescorted access authorization to ensure that the applicant is who he or she claims to be. A licensee shall review official identification documents (e.g., driver's license; passport; government identification;

certificate of birth issued by the state, province, or country of birth) and compare the documents to personal information data provided by the individual to identify any discrepancy in the information. Licensees shall document the type, expiration, and identification number of the identification document, or maintain a photocopy of identifying documents on file in accordance with subsection (g) of this section.

Licensees shall certify in writing that the identification was properly reviewed and shall maintain the certification and all related documents for review upon inspection;

(C) employment history verification. Licensees shall complete an employment history verification, including military history. Licensees shall verify the individual's employment with each previous employer for the most recent seven years before the date of application;

(D) verification of education. Licensees shall verify the individual's education during the claimed period;

(E) character and reputation determination. Licensees shall complete reference checks to determine the character and reputation of the individual who has applied for unescorted access authorization. Unless other references are not available, reference checks may not be conducted with any person who is known to be a close member of the individual's family, including but not limited to the individual's spouse, parents, siblings, or children, or any individual who resides in the individual's

permanent household. Reference checks under subsections (b) and (c) of this section, this subsection, and subsections (e) - (h) of this section must be limited to whether the individual has been and continues to be trustworthy and reliable;

(F) the licensee shall also, to the extent possible, obtain independent information to corroborate the information provided by the individual (e.g., seek references not supplied by the individual); and

(G) if a previous employer, educational institution, or any other entity with which the individual claims to have been engaged fails to provide information or indicates an inability or unwillingness to provide information within a time frame deemed appropriate by the licensee, but at least after 10 business days of the request or if the licensee is unable to reach the entity, the licensee shall document the refusal, unwillingness, or inability in the record of investigation and attempt to obtain the information from an alternate source.

(2) Grandfathering.

(A) Individuals who have been determined to be trustworthy and reliable for unescorted access to category 1 or category 2 quantities of radioactive material under the Fingerprint Orders may continue to have unescorted access to

category 1 and category 2 quantities of radioactive material without further investigation. These individuals shall be subject to the reinvestigation requirement.

(B) Individuals who have been determined to be trustworthy and reliable under the provisions of 10 CFR Part 73 or the Security Orders for access to safeguards information, safeguards information-modified handling, or risk-significant material may have unescorted access to category 1 and category 2 quantities of radioactive material without further investigation. The licensee shall document that the individual was determined to be trustworthy and reliable under the provisions of 10 CFR Part 73 or a Security Order. Security Order, in this context, refers to any order that was issued by the United States Nuclear Regulatory Commission (NRC) that required fingerprints and an FBI criminal history records check for access to safeguards information, safeguards information-modified handling, or risk significant material such as special nuclear material or large quantities of uranium hexafluoride. These individuals shall be subject to the reinvestigation requirement.

(3) Reinvestigations. Licensees shall conduct a reinvestigation every 10 years for any individual with unescorted access to category 1 or category 2 quantities of radioactive material. The reinvestigation shall consist of fingerprinting and an FBI identification and criminal history records check in accordance with subsection (e) of this section. The reinvestigations must be completed within 10 years of the date on which these elements were last completed.

(e) Requirements for criminal history records checks of individuals granted unescorted access to category 1 or category 2 quantities of radioactive material.

(1) General performance objective and requirements.

(A) Except for those individuals listed in subsection (f) of this section and those individuals grandfathered under subsection (d)(2) of this section, each licensee subject to the provisions of subsections (b) - (d) of this section, this subsection, and subsections (f) - (h) of this section shall fingerprint each individual who is to be permitted unescorted access to category 1 or category 2 quantities of radioactive material. Licensees shall transmit all collected fingerprints to the NRC for transmission to the FBI. The licensee shall use the information received from the FBI as part of the required background investigation to determine whether to grant or deny further unescorted access to category 1 or category 2 quantities of radioactive materials for that individual.

(B) The licensee shall notify each affected individual that his or her fingerprints will be used to secure a review of his or her criminal history record and shall inform him or her of the procedures for revising the record or adding explanations to the record.

(C) Fingerprinting is not required if a licensee is reinstating an individual's unescorted access authorization to category 1 or category 2 quantities of radioactive materials if:

(i) the individual returns to the same facility that granted unescorted access authorization within 365 days of the termination of his or her unescorted access authorization; and

(ii) the previous access was terminated under favorable conditions.

(D) Fingerprints do not need to be taken if an individual who is an employee of a licensee, contractor, manufacturer, or supplier has been granted unescorted access to category 1 or category 2 quantities of radioactive material, access to safeguards information, or safeguards information-modified handling by another licensee, based upon a background investigation conducted under this section, the Fingerprint Orders, or 10 CFR Part 73. An existing criminal history records check file may be transferred to the licensee asked to grant unescorted access in accordance with the provisions of subsection (g)(3) of this section.

(E) Licensees shall use the information obtained as part of a criminal history records check solely for the purpose of determining an individual's

suitability for unescorted access authorization to category 1 or category 2 quantities of radioactive materials, access to safeguards information, or safeguards information-modified handling.

(2) Prohibitions.

(A) Licensees may not base a final determination to deny an individual unescorted access authorization to category 1 or category 2 quantities of radioactive material solely on the basis of information received from the FBI involving:

(i) an arrest more than one year old for which there is no information of the disposition of the case; or

(ii) an arrest that resulted in dismissal of the charge or an acquittal.

(B) Licensees may not use information received from a criminal history records check obtained under subsections (b) - (d) of this section, this subsection, and subsections (f) - (h) of this section in a manner that would infringe upon the rights of any individual under the First Amendment to the Constitution of the United States nor shall licensees use the information in any way that would

discriminate among individuals on the basis of race, religion, national origin, gender, or age.

(3) Procedures for processing of fingerprint checks.

(A) For the purpose of complying with subsections (b) - (d) of this section, this subsection, and subsections (f) - (h) of this section, licensees shall use an appropriate method listed in 10 CFR §37.7 to submit to the United States Nuclear Regulatory Commission, Director, Division of Physical and Cyber Security Policy [Facilities and Security], 11545 Rockville Pike, ATTN: Criminal History Program/Mail Stop T-8B20 [T-03B46M], Rockville, Maryland 20852 [20852--2738], one completed, legible standard fingerprint card (Form FD-258, ORIMDNRCOOOZ), electronic fingerprint scan or, where practicable, other fingerprint record for each individual requiring unescorted access to category 1 or category 2 quantities of radioactive material. Copies of these forms may be obtained by emailing MAILSVS.Resource@nrc.gov. [writing the Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; by calling (630) 829-9565; or by e-mail to FORMS.Resource@nrc.gov.] Guidance on submitting electronic fingerprints can be found at <https://www.nrc.gov/security/chp.html> [<http://www.nrc.gov/site-help/e-submittals.html>].

(B) Fees for the processing of fingerprint checks are due upon application. Licensees shall submit payment with the application for the processing of fingerprints through corporate check, certified check, cashier's check, money order, or electronic payment, made payable to "U.S. NRC." (For guidance on making electronic payments, contact the Division of Physical and Cyber Security Policy by e-mailing [Crimhist.Resource@nrc.gov](mailto:Crimhist.Resource@nrc.gov) [Security Branch, Division of Facilities and Security at (301) 415-7513].) Combined payment for multiple applications is acceptable. The NRC publishes the amount of the fingerprint check application fee on the NRC's public website. (To find the current fee amount, go to the Licensee Criminal History Records Checks & Firearms Background Check information page at <https://www.nrc.gov/security/chp.html> [Electronic Submittals page at <http://www.nrc.gov/site-help/e-submittals.html>] and see the link for How do I determine how much to pay for the request? [the Criminal History under Electronic Submission Systems].)

(C) The NRC will forward to the submitting licensee all data received from the FBI as a result of the licensee's application(s) for criminal history records checks.

(f) Relief from fingerprinting, identification, and criminal history records checks and other elements of background investigations for designated categories of individuals permitted unescorted access to certain radioactive materials.

(1) Fingerprinting, and the identification and criminal history records checks required by §149 of the Atomic Energy Act of 1954, as amended, and other elements of the background investigation, are not required for the following individuals prior to granting unescorted access to category 1 or category 2 quantities of radioactive materials:

(A) an employee of the NRC or of the Executive Branch of the United States (U.S.) Government who has undergone fingerprinting for a prior U.S. Government criminal history records check;

(B) a Member of Congress;

(C) an employee of a member of Congress or Congressional committee who has undergone fingerprinting for a prior U.S. Government criminal history records check;

(D) the Governor of a State or his or her designated State employee representative;

(E) Federal, State, or local law enforcement personnel;

(F) State Radiation Control Program Directors and State Homeland Security Advisors or their designated State employee representatives;

(G) Agreement State employees conducting security inspections on behalf of the NRC under an agreement executed under §274.i. of the Atomic Energy Act;

(H) representatives of the International Atomic Energy Agency (IAEA) engaged in activities associated with the U.S./IAEA Safeguards Agreement who have been certified by the NRC;

(I) emergency response personnel who are responding to an emergency;

(J) commercial vehicle drivers for road shipments of category 1 and category 2 quantities of radioactive material;

(K) package handlers at transportation facilities such as freight terminals and railroad yards;

(L) any individual who has an active federal security clearance, provided that he or she makes available the appropriate documentation. Written

confirmation from the agency/employer that granted the federal security clearance or reviewed the criminal history records check must be provided to the licensee. The licensee shall retain this documentation for a period of three years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material; and

(M) any individual employed by a service provider licensee for which the service provider licensee has conducted the background investigation for the individual and approved the individual for unescorted access to category 1 or category 2 quantities of radioactive material. Written verification from the service provider must be provided to the licensee. The licensee shall retain the documentation for a period of three years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material; and

(2) Fingerprinting, and the identification and criminal history records checks required by §149 of the Atomic Energy Act of 1954, as amended, are not required for an individual who has had a favorably adjudicated U.S. Government criminal history records check within the last five years, under a comparable U.S. Government program involving fingerprinting and an FBI identification and criminal history records check provided that he or she makes available the appropriate documentation. Written confirmation from the agency/employer that reviewed the criminal history records check must be provided to the licensee. The licensee shall

retain this documentation for a period of three years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material. These programs include, but are not limited to:

(A) National Agency Check;

(B) Transportation Worker Identification Credentials under 49 CFR Part 1572;

(C) Bureau of Alcohol, Tobacco, Firearms, and Explosives background check and clearances under 27 CFR Part 555;

(D) Health and Human Services security risk assessments for possession and use of select agents and toxins under 42 CFR Part 73;

(E) Hazardous Material security threat assessment for hazardous material endorsement to commercial drivers license under 49 CFR Part 1572; and

(F) Customs and Border Protection's Free and Secure Trade Program.

(g) Protection of information.

(1) Each licensee who obtains background information on an individual under subsections (b) - (f) of this section, this subsection, and subsection (h) of this section shall establish and maintain a system of files and written procedures for protection of the records and the personal information from unauthorized disclosure.

(2) The licensee may not disclose the record or personal information collected and maintained to persons other than the subject individual, his or her representative, or to those who have a need to have access to the information in performing assigned duties in the process of granting or denying unescorted access to category 1 or category 2 quantities of radioactive material, safeguards information, or safeguards information-modified handling. No individual authorized to have access to the information may disseminate the information to any other individual who does not have a need to know.

(3) The personal information obtained on an individual from a background investigation may be provided to another licensee:

(A) upon the individual's written request to the licensee holding the data to disseminate the information contained in his or her file; and

(B) the recipient licensee verifies information such as name, date of birth, social security number, gender, and other applicable physical characteristics.

(4) The licensee shall make background investigation records obtained under subsections (b) - (f) of this section, this subsection, and subsection (h) of this section available for examination by an authorized representative of the commission to determine compliance with the regulations and laws.

(5) The licensee shall retain all fingerprint and criminal history records (including data indicating no record) received from the FBI or a copy of these records if the individual's file has been transferred on an individual for three years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material.

(h) Access authorization program review.

(1) Each licensee shall be responsible for the continuing effectiveness of the access authorization program. Each licensee shall ensure that access authorization programs are reviewed to confirm compliance with the requirements of subsections (b) - (g) of this section and this subsection and that comprehensive actions are taken to correct any noncompliance identified. The review program shall evaluate all program

performance objectives and requirements. Each licensee shall periodically (at least annually) review the access authorization program content and implementation.

(2) The results of the reviews, along with any recommendations, must be documented. Each review report must identify conditions that are adverse to the proper performance of the access authorization program, the cause of the condition(s), and, when appropriate, recommend corrective actions, and corrective actions taken. The licensee shall review the findings and take any additional corrective actions necessary to preclude repetition of the condition, including reassessment of the deficient areas where indicated.

(3) Review records must be maintained for three years.

(i) Security program.

(1) Applicability.

(A) Each licensee that possesses an aggregated category 1 or category 2 quantity of radioactive material shall establish, implement, and maintain a security program in accordance with the requirements of this subsection and subsections (j) - (q) of this section.

(B) An applicant for a new license, and each licensee that would become newly subject to the requirements of this subsection and subsections (j) - (q) of this section upon application for modification of its license, shall implement the requirements of this subsection and subsections (j) - (q) of this section, as appropriate, before taking possession of an aggregated category 1 or category 2 quantity of radioactive material.

(C) Any licensee that has not previously implemented the Security Orders or been subject to the provisions of this subsection and subsections (j) - (q) of this section shall provide written notification to the commission at least 90 days before aggregating radioactive material to a quantity that equals or exceeds the category 2 threshold.

(2) General performance objective. Each licensee shall establish, implement, and maintain a security program that is designed to monitor and, without delay, detect, assess, and respond to an actual or attempted unauthorized access to category 1 or category 2 quantities of radioactive material.

(3) Program features. Each licensee's security program must include the program features, as appropriate, described in subsections (j) - (p) of this section.

(j) General security program requirements.

(1) Security plan.

(A) Each licensee identified in subsection (i)(1) of this section shall develop a written security plan specific to its facilities and operations. The purpose of the security plan is to establish the licensee's overall security strategy to ensure the integrated and effective functioning of the security program required by subsection (i) of this section, this subsection, and subsections (k) - (q) of this section. The security plan must, at a minimum:

(i) describe the measures and strategies used to implement the requirements of subsection (i) of this section, this subsection, and subsections (k) - (q) of this section; and

(ii) identify the security resources, equipment, and technology used to satisfy the requirements of subsection (i) of this section, this subsection, and subsections (k) - (q) of this section.

(B) The security plan must be reviewed and approved by the individual with overall responsibility for the security program.

(C) A licensee shall revise its security plan as necessary to ensure the effective implementation of the executive director's requirements. The licensee shall ensure that:

(i) the revision has been reviewed and approved by the individual with overall responsibility for the security program; and

(ii) the affected individuals are instructed on the revised plan before the changes are implemented.

(D) The licensee shall retain a copy of the current security plan as a record for three years after the security plan is no longer required. If any portion of the plan is superseded, the licensee shall retain the superseded material for three years after the record is superseded.

(2) Implementing procedures.

(A) The licensee shall develop and maintain written procedures that document how the requirements of subsection (i) of this section, this subsection, and subsections (k) - (q) of this section and the security plan will be met.

(B) The implementing procedures and revisions to these procedures must be approved in writing by the individual with overall responsibility for the security program.

(C) The licensee shall retain a copy of the current procedure as a record for three years after the procedure is no longer needed. Superseded portions of the procedure must be retained for three years after the record is superseded.

(3) Training.

(A) Each licensee shall conduct training to ensure that those individuals implementing the security program possess and maintain the knowledge, skills, and abilities to carry out their assigned duties and responsibilities effectively. The training must include instruction in:

(i) the licensee's security program and procedures to secure category 1 or category 2 quantities of radioactive material and the purposes and functions of the security measures employed;

(ii) the responsibility to report promptly to the licensee any condition that causes or may cause a violation of the requirements of the commission, the NRC, or any Agreement State;

(iii) the responsibility of the licensee to report promptly to the LLEA and licensee any actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material; and

(iv) the appropriate response to security alarms.

(B) In determining those individuals who shall be trained on the security program, the licensee shall consider each individual's assigned activities during authorized use and response to potential situations involving actual or attempted theft, diversion, or sabotage of category 1 or category 2 quantities of radioactive material. The extent of the training must be commensurate with the individual's potential involvement in the security of category 1 or category 2 quantities of radioactive material.

(C) Refresher training must be provided at a frequency not to exceed 12 months and when significant changes have been made to the security program. This training must include:

(i) review of the training requirements of this paragraph and any changes made to the security program since the last training;

(ii) reports on any relevant security issues, problems, and lessons learned;

(iii) relevant results of commission inspections; and

(iv) relevant results of the licensee's program review and testing and maintenance.

(D) The licensee shall maintain records of the initial and refresher training for three years from the date of the training. The training records must include dates of the training, topics covered, a list of licensee personnel in attendance, and related information.

(4) Protection of information.

(A) Licensees authorized to possess category 1 or category 2 quantities of radioactive material shall limit access to and unauthorized disclosure of their security plan, implementing procedures, and the list of individuals that have been approved for unescorted access.

(B) Efforts to limit access shall include the development, implementation, and maintenance of written policies and procedures for controlling

access to, and for proper handling and protection against unauthorized disclosure of, the security plan, [and] implementing procedures, and the list of individuals that have been approved for unescorted access.

(C) Before granting an individual access to the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access, licensees shall:

(i) evaluate an individual's need to know the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access; and

(ii) if the individual has not been authorized for unescorted access to category 1 or category 2 quantities of radioactive material, safeguards information, or safeguards information-modified handling, the licensee must complete a background investigation to determine the individual's trustworthiness and reliability. A trustworthiness and reliability determination shall be conducted by the reviewing official and shall include the background investigation elements contained in subsection (d)(1)(B) - (G) of this section.

(D) Licensees need not subject the following individuals to the background investigation elements for protection of information:

(i) the categories of individuals listed in subsection (f)(1) of this section; or

(ii) security service provider employees, provided written verification that the employee has been determined to be trustworthy and reliable, by the required background investigation in subsection (d)(1)(B) - (G) of this section, has been provided by the security service provider.

(E) The licensee shall document the basis for concluding that an individual is trustworthy and reliable and should be granted access to the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access.

(F) Licensees shall maintain a list of persons currently approved for access to the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access. When a licensee determines that a person no longer needs access to the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access or no longer meets the access authorization requirements for access to the information, the licensee shall remove the person from the approved list as soon as possible, but no later than [no-later-than] seven working days, and take prompt measures to ensure

that the individual is unable to obtain the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access.

(G) When not in use, the licensee shall store its security plan, [and] implementing procedures, and the list of individuals that have been approved for unescorted access in a manner to prevent unauthorized access. Information stored in non-removable electronic form must be password protected.

(H) The licensee shall retain as a record for three years after the document is no longer needed:

(i) a copy of the information protection procedures; and

(ii) the list of individuals approved for access to the security plan, [or] implementing procedures, or the list of individuals that have been approved for unescorted access.

(k) LLEA coordination.

(1) A licensee subject to subsections (i) and (j) of this section, this subsection, and subsections (l) - (q) of this section shall coordinate, to the extent

practicable, with an LLEA for responding to threats to the licensee's facility, including any necessary armed response. The information provided to the LLEA must include:

(A) a description of the facilities and the category 1 and category 2 quantities of radioactive materials along with a description of the licensee's security measures that have been implemented to comply with subsections (i) and (j) of this section, this subsection, and subsections (l) - (q) of this section; and

(B) a notification that the licensee will request a timely armed response by the LLEA to any actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of material.

(2) The licensee shall notify the executive director within three business days if:

(A) the LLEA has not responded to the request for coordination within 60 days of the coordination request; or

(B) the LLEA notifies the licensee that the LLEA does not plan to participate in coordination activities.

(3) The licensee shall document its efforts to coordinate with the LLEA.

The documentation must be kept for three years.

(4) The licensee shall coordinate with the LLEA at least every 12 months, or when changes to the facility design or operation adversely affect the potential vulnerability of the licensee's material to theft, sabotage, or diversion.

(l) Security zones.

(1) Licensees shall ensure that all aggregated category 1 and category 2 quantities of radioactive material are used or stored within licensee established security zones. Security zones may be permanent or temporary.

(2) Temporary security zones must be established as necessary to meet the licensee's transitory or intermittent business activities, such as periods of maintenance, source delivery, and source replacement.

(3) Security zones must, at a minimum, allow unescorted access only to approved individuals through:

(A) isolation of category 1 and category 2 quantities of radioactive materials by the use of continuous physical barriers that allow access to the security

zone only through established access control points. A physical barrier is a natural or man-made structure or formation sufficient for the isolation of the category 1 or category 2 quantities of radioactive material within a security zone; or

(B) direct control of the security zone by approved individuals at all times; or

(C) a combination of continuous physical barriers and direct control.

(4) For category 1 quantities of radioactive material during periods of maintenance, source receipt, preparation for shipment, installation, or source removal or exchange, the licensee shall, at a minimum, provide sufficient individuals approved for unescorted access to maintain continuous surveillance of sources in temporary security zones and in any security zone in which physical barriers or intrusion detection systems have been disabled to allow such activities.

(5) Individuals not approved for unescorted access to category 1 or category 2 quantities of radioactive material must be escorted by an approved individual when in a security zone.

(m) Monitoring, detection, and assessment.

(1) Monitoring and detection.

(A) Licensees shall establish and maintain the capability to continuously monitor and detect without delay all unauthorized entries into its security zones. Licensees shall provide the means to maintain continuous monitoring and detection capability in the event of a loss of the primary power source or provide for an alarm and response in the event of a loss of the capability to continuously monitor and detect unauthorized entries.

(B) Monitoring and detection must be performed by:

(i) a monitored intrusion detection system that is linked to an onsite or offsite central monitoring facility;

(ii) electronic devices for intrusion detection alarms that will alert nearby facility personnel;

(iii) a monitored video surveillance system;

(iv) direct visual surveillance by approved individuals located within the security zone; or

(v) direct visual surveillance by a licensee designated individual located outside the security zone.

(C) A licensee subject to subsections (i) - (l) of this section, this subsection, and subsections (n) - (q) of this section shall also have a means to detect unauthorized removal of the radioactive material from the security zone. This detection capability must provide:

(i) for category 1 quantities of radioactive material, immediate detection of any attempted unauthorized removal of the radioactive material from the security zone. Such immediate detection capability must be provided by:

(I) electronic sensors linked to an alarm;

(II) continuous monitored video surveillance; or

(III) direct visual surveillance.

(ii) For category 2 quantities of radioactive material, weekly verification through physical checks, tamper indicating devices, use, or other means to ensure that the radioactive material is present.

(2) Assessment. Licensees shall immediately assess each actual or attempted unauthorized entry into the security zone to determine whether the unauthorized access was an actual or attempted theft, sabotage, or diversion.

(3) Personnel communications and data transmission. For personnel and automated or electronic systems supporting the licensee's monitoring, detection, and assessment systems, licensees shall:

(A) maintain continuous capability for personnel communication and electronic data transmission and processing among site security systems; and

(B) provide an alternative communication capability for personnel, and an alternative data transmission and processing capability, in the event of a loss of the primary means of communication or data transmission and processing. Alternative communications and data transmission systems may not be subject to the same failure modes as the primary systems.

(4) Response. Licensees shall immediately respond to any actual or attempted unauthorized access to the security zones, or actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material at licensee facilities or temporary job sites. For any unauthorized access involving an actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material, the licensee's response shall include requesting, without delay, an armed response from the LLEA.

(n) Maintenance and testing.

(1) Each licensee subject to subsections (i) - (m) of this section, this subsection, and subsections (o) - (q) of this section shall implement a maintenance and testing program to ensure that intrusion alarms, associated communication systems, and other physical components of the systems used to secure or detect unauthorized access to radioactive material are maintained in operable condition and capable of performing their intended function when needed. The equipment relied on to meet the security requirements of this section must be inspected and tested for operability and performance at the manufacturer's suggested frequency. If there is no manufacturer's suggested frequency, the testing must be performed at least annually, not to exceed 12 months.

(2) The licensee shall maintain records on the maintenance and testing activities for three years.

(o) Requirements for mobile devices. Each licensee that possesses mobile devices containing category 1 or category 2 quantities of radioactive material must:

(1) have two independent physical controls that form tangible barriers to secure the material from unauthorized removal when the device is not under direct control and constant surveillance by the licensee; and

(2) for devices in or on a vehicle or trailer, unless the health and safety requirements for a site prohibit the disabling of the vehicle, the licensee shall utilize a method to disable the vehicle or trailer when not under direct control and constant surveillance by the licensee. Licensees shall not rely on the removal of an ignition key to meet this requirement.

(p) Security program review.

(1) Each licensee shall be responsible for the continuing effectiveness of the security program. Each licensee shall ensure that the security program is reviewed to confirm compliance with the requirements of subsections (i) - (o) of this section, this subsection, and subsection (q) of this section and that comprehensive actions are

taken to correct any noncompliance that is identified. The review must include the radioactive material security program content and implementation. Each licensee shall periodically (at least annually) review the security program content and implementation.

(2) The results of the review, along with any recommendations, must be documented. Each review report must identify conditions that are adverse to the proper performance of the security program, the cause of the condition(s), and, when appropriate, recommend corrective actions, and corrective actions taken. The licensee shall review the findings and take any additional corrective actions necessary to preclude repetition of the condition, including reassessment of the deficient areas where indicated.

(3) The licensee shall maintain the review documentation for three years.

(q) Reporting of events.

(1) The licensee shall immediately notify the LLEA after determining that an unauthorized entry resulted in an actual or attempted theft, sabotage, or diversion of a category 1 or category 2 quantity of radioactive material. As soon as possible after initiating a response, but not at the expense of causing delay or interfering with the LLEA response to the event, the licensee shall notify the Office of Compliance and

Enforcement 24-hour Emergency Response at 1-800-832-8224. In no case shall the notification to the commission or the NRC be later than four hours after the discovery of any attempted or actual theft, sabotage, or diversion.

(2) The licensee shall assess any suspicious activity related to possible theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material and notify the LLEA as appropriate. As soon as possible but not later than four hours after notifying the LLEA, the licensee shall notify the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224.

(3) The initial telephonic notification required by paragraph (1) of this subsection must be followed, within a period of 30 days, by a written report submitted to the executive director. The report must include sufficient information for commission analysis and evaluation, including identification of any necessary corrective actions to prevent future instances.

(r) Additional requirements for transfer of category 1 and category 2 quantities of radioactive material. A licensee transferring a category 1 or category 2 quantity of radioactive material to a licensee of the commission, the NRC, or an Agreement State shall meet the license verification provisions listed in this subsection instead of those listed in §336.331(d) of this title (relating to Transfer of Radioactive Material):

(1) Any licensee transferring category 1 quantities of radioactive material to a licensee of the commission, the NRC, or an Agreement State, prior to conducting such transfer, shall verify with the NRC's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred and that the licensee is authorized to receive radioactive material at the location requested for delivery. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.

(2) Any licensee transferring category 2 quantities of radioactive material to a licensee of the commission, the NRC, or an Agreement State, prior to conducting such transfer, shall verify with the NRC's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.

(3) In an emergency where the licensee cannot reach the license issuing authority and the license verification system is nonfunctional, the licensee may accept a written certification by the transferee that it is authorized by license to receive the

type, form, and quantity of radioactive material to be transferred. The certification must include the license number, current revision number, issuing agency, expiration date, and for a category 1 shipment the authorized address. The licensee shall keep a copy of the certification. The certification must be confirmed by use of the NRC's license verification system or by contacting the license issuing authority by the end of the next business day.

(4) The transferor shall keep a copy of the verification documentation as a record for three years.

(s) Applicability of physical protection of category 1 and category 2 quantities of radioactive material during transit. The shipping licensee shall be responsible for meeting the requirements of subsection (r) of this section, this subsection, and subsections (t) - (w) of this section unless the receiving licensee has agreed in writing to arrange for the in-transit physical protection required under subsection (r) of this section, this subsection, and subsections (t) - (w) of this section.

(t) Preplanning and coordination of shipment of category 1 or category 2 quantities of radioactive material.

(1) Each licensee that plans to transport, or deliver to a carrier for transport, licensed material that is a category 1 quantity of radioactive material outside the confines of the licensee's facility or other place of use or storage shall:

(A) preplan and coordinate shipment arrival and departure times with the receiving licensee;

(B) preplan and coordinate shipment information with the governor or the governor's designee of any state through which the shipment will pass to:

(i) discuss the state's intention to provide law enforcement escorts; and

(ii) identify safe havens; and

(C) document the preplanning and coordination activities.

(2) Each licensee that plans to transport, or deliver to a carrier for transport, licensed material that is a category 2 quantity of radioactive material outside the confines of the licensee's facility or other place of use or storage shall

coordinate the shipment no-later-than arrival time and the expected shipment arrival with the receiving licensee. The licensee shall document the coordination activities.

(3) Each licensee who receives a shipment of a category 2 quantity of radioactive material shall confirm receipt of the shipment with the originator. If the shipment has not arrived by the no-later-than arrival time, the receiving licensee shall notify the originator.

(4) Each licensee, who transports or plans to transport a shipment of a category 2 quantity of radioactive material, and determines that the shipment will arrive after the no-later-than arrival time provided pursuant to paragraph (2) of this subsection, shall promptly notify the receiving licensee of the new no-later-than arrival time.

(5) The licensee shall retain a copy of the documentation for preplanning and coordination and any revision thereof as a record for three years.

(u) Advance notification of shipment of category 1 quantities of radioactive material. As specified in paragraphs (1) and (2) of this subsection, each licensee shall provide advance notification to the NRC and the governor of a state, or the governor's designee, of the shipment of licensed material in a category 1 quantity, through or across the boundary of the state, before the transport or delivery to a carrier for

transport of the licensed material outside the confines of the licensee's facility or other place of use or storage.

(1) Procedures for submitting advance notification.

(A) The notification must be made to the commission and to the office of each appropriate governor or governor's designee. The contact information, including telephone and mailing addresses, of governors and governors' designees, is available on the NRC's website at <https://scp.nrc.gov/special/designee.pdf>. A list of the contact information is also available upon request from the Director, Division of Materials Safety, Security, State, and Tribal [Material, State, Tribal, and Rulemaking] Programs, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

(B) A notification delivered by mail must be postmarked at least seven days before transport of the shipment commences at the shipping facility.

(C) A notification delivered by any means other than mail must reach the commission at least four days before the transport of the shipment commences and must reach the office of the governor or the governor's designee at least four days before transport of a shipment within or through the state.

(2) Information to be furnished in advance notification of shipment. Each advance notification of shipment of category 1 quantities of radioactive material must contain the following information, if available at the time of notification:

(A) the name, address, and telephone number of the shipper, carrier, and receiver of the category 1 radioactive material;

(B) the license numbers of the shipper and receiver;

(C) a description of the radioactive material contained in the shipment, including the radionuclides and quantity;

(D) the point of origin of the shipment and the estimated time and date that shipment will commence;

(E) the estimated time and date that the shipment is expected to enter each state along the route;

(F) the estimated time and date of arrival of the shipment at the destination; and

(G) a point of contact, with a telephone number, for current shipment information.

(3) Revision notice.

(A) The licensee shall provide any information not previously available at the time of the initial notification, as soon as the information becomes available but not later than commencement of the shipment, to the governor of the state or the governor's designee and to the commission.

(B) A licensee shall promptly notify the governor of the state or the governor's designee of any changes to the information provided in accordance with paragraph (2) of this subsection and subparagraph (A) of this paragraph. The licensee shall also immediately notify the commission of any such changes.

(4) Cancellation notice. Each licensee who cancels a shipment for which advance notification has been sent shall send a cancellation notice to the governor of each state or to the governor's designee previously notified and to the commission. The licensee shall send the cancellation notice before the shipment would have commenced or as soon thereafter as possible. The licensee shall state in the notice that it is a cancellation and identify the advance notification that is being cancelled.

(5) Records. The licensee shall retain a copy of the advance notification and any revision and cancellation notices as a record for three years.

(6) Protection of information. State officials, State employees, and other individuals, whether or not licensees of the commission, NRC, or an Agreement State, who receive schedule information of the kind specified in paragraph (2) of this subsection shall protect that information against unauthorized disclosure as specified in subsection (j)(4) of this section.

(v) Requirements for physical protection of category 1 and category 2 quantities of radioactive material during shipment.

(1) Shipments by road.

(A) Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 1 quantity of radioactive material shall:

(i) Ensure that movement control centers are established that maintain position information from a remote location. These control centers must monitor shipments 24 hours a day, seven days a week, and have the ability to communicate immediately, in an emergency, with the appropriate law enforcement agencies.

(ii) Ensure that redundant communications are established that allow the transport to contact the escort vehicle (when used) and movement control center at all times. Redundant communications may not be subject to the same interference factors as the primary communication.

(iii) Ensure that shipments are continuously and actively monitored by a telemetric position monitoring system or an alternative tracking system reporting to a movement control center. A movement control center must provide positive confirmation of the location, status, and control over the shipment. The movement control center must be prepared to promptly implement preplanned procedures in response to deviations from the authorized route or a notification of actual, attempted, or suspicious activities related to the theft, loss, or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.

(iv) Provide an individual to accompany the driver for those highway shipments with a driving time period greater than the maximum number of allowable hours of service in a 24-hour duty day as established by the Department of Transportation Federal Motor Carrier Safety Administration. The accompanying individual may be another driver.

(v) Develop written normal and contingency procedures to address:

(I) notifications to the communication center and law enforcement agencies;

(II) communication protocols. Communication protocols must include a strategy for the use of authentication codes and duress codes and provisions for refueling or other stops, detours, and locations where communication is expected to be temporarily lost;

(III) loss of communications; and

(IV) responses to an actual or attempted theft or diversion of a shipment.

(vi) Each licensee who makes arrangements for the shipment of category 1 quantities of radioactive material shall ensure that drivers, accompanying personnel, and movement control center personnel have access to the normal and contingency procedures.

(B) Each licensee that transports category 2 quantities of radioactive material shall maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance.

(C) Each licensee who delivers to a carrier for transport, in a single shipment, a category 2 quantity of radioactive material shall:

(i) use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and/or surveillance, the package tracking system must allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control;

(ii) use carriers that maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and

(iii) use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery or return.

(2) Shipments by rail.

(A) Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 1 quantity of radioactive material shall:

(i) Ensure that rail shipments are monitored by a telemetric position monitoring system or an alternative tracking system reporting to the licensee, third-party, or railroad communications center. The communications center shall provide positive confirmation of the location of the shipment and its status. The communications center shall implement preplanned procedures in response to deviations from the authorized route or to a notification of actual, attempted, or suspicious activities related to the theft or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.

(ii) Ensure that periodic reports to the communications center are made at preset intervals.

(B) Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 2 quantity of radioactive material shall:

(i) use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and/or surveillance, the package tracking system must allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control;

(ii) use carriers that maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and

(iii) use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery or return.

(3) Investigations. Each licensee who makes arrangements for the shipment of category 1 quantities of radioactive material shall immediately conduct an investigation upon the discovery that a category 1 shipment is lost or missing. Each licensee who makes arrangements for the shipment of category 2 quantities of radioactive material shall immediately conduct an investigation, in coordination with the receiving licensee, of any shipment that has not arrived by the designated no-later-than arrival time.

(w) Reporting of events.

(1) The shipping licensee shall notify the appropriate LLEA and the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224 within one hour of its determination that a shipment of category 1 quantities of radioactive material is lost or missing. The appropriate LLEA would be the law enforcement agency in the area of the shipment's last confirmed location. During the investigation required by subsection (v)(3) of this section, the shipping licensee will provide agreed upon updates to the executive director on the status of the investigation.

(2) The shipping licensee shall notify the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224 within four hours of its determination that a shipment of category 2 quantities of radioactive material is lost or missing. If, after 24 hours of its determination that the shipment is lost or missing, the radioactive material has not been located and secured, the licensee shall immediately notify the executive director.

(3) The shipping licensee shall notify the designated LLEA along the shipment route as soon as possible upon discovery of any actual or attempted theft or diversion of a shipment or suspicious activities related to the theft or diversion of a shipment of a category 1 quantity of radioactive material. As soon as possible after

notifying the LLEA, the licensee shall notify the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224 upon discovery of any actual or attempted theft or diversion of a shipment or any suspicious activity related to the shipment of category 1 radioactive material.

(4) The shipping licensee shall notify the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224 as soon as possible upon discovery of any actual or attempted theft or diversion of a shipment or any suspicious activity related to the shipment, of a category 2 quantity of radioactive material.

(5) The shipping licensee shall notify the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224 and the LLEA as soon as possible upon recovery of any lost or missing category 1 quantities of radioactive material.

(6) The shipping licensee shall notify the Office of Compliance and Enforcement 24-hour Emergency Response at 1-800-832-8224 as soon as possible upon recovery of any lost or missing category 2 quantities of radioactive material.

(7) The initial telephonic notification required by paragraphs (1) - (4) of this subsection must be followed within a period of 30 days by a written report

submitted to the executive director. A written report is not required for notifications on suspicious activities required by paragraphs (3) and (4) of this subsection. The report must set forth the following information:

(A) a description of the licensed material involved, including kind, quantity, and chemical and physical form;

(B) a description of the circumstances under which the loss or theft occurred;

(C) a statement of disposition, or probable disposition, of the licensed material involved;

(D) actions that have been taken, or will be taken, to recover the material; and

(E) procedures or measures that have been, or will be, adopted to ensure against a recurrence of the loss or theft of licensed material.

(8) Subsequent to filing the written report, the licensee shall also report any additional substantive information on the loss or theft within 30 days after the licensee learns of such information.

(x) Form of records. Each record required by this section must be legible throughout the retention period specified in regulation by the licensing authority. The record may be the original or a reproduced copy or a microform, provided that the copy or microform is authenticated by authorized personnel and that the microform is capable of producing a clear copy throughout the required retention period. The record may also be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period. Records such as letters, drawings, and specifications, must include all pertinent information such as stamps, initials, and signatures. The licensee shall maintain adequate safeguards against tampering with and loss of records.

(y) Record retention. Licensees shall maintain the records that are required in this section for the period specified by the appropriate regulation. If a retention period is not otherwise specified, these records must be retained until the executive director terminates the facility's license. All records related to this section may be destroyed upon executive director termination of the facility license.

(z) Category 1 and category 2 radioactive materials. The terabecquerel (TBq) values are the regulatory standard. The curie (Ci) values specified are obtained by converting from the TBq value. The Ci values are provided for practical usefulness only.
