Plain Language Summary of Proposed Rule Amendment to Chapter 116 - Control of Air Pollution by Permits for New Construction or Modification

Introduction

The proposed rulemaking (Project No. 2022-034-116-AI) would amend 30 Texas Administrative Code Chapter 116 - Control of Air Pollution by Permits for New Construction or Modification, Subchapter C, Division 6.

Under 30 TAC Chapter 116, the Texas Commission on Environmental Quality (TCEQ) establishes requirements for permitting certain types of facilities in Texas. This proposed amendment would ensure that owners or operators of concrete batch plants authorized under TCEQ's Air Quality Standard Permit for Concrete Batch Plants comply with public notice and hearing requirements if they propose to move a registered concrete batch plant to a new location at an existing site.

Summary of Proposed Rule

The proposed rulemaking would amend §116.615 by adding language requiring that the owner or operator of concrete batch plants authorized under TCEQ's Air Quality Standard Permit for Concrete Batch Plants comply with certain public notice and hearing requirements if they propose to move the registered concrete batch plant to a new location on the site. The owner or operator shall submit a new or amended registration and fee and comply with the public notice requirements, including the opportunity to request a contested case hearing, unless the new location is greater than 440 yards from any property line.
