Re: Sunset Management Recommendation 1.2: Commission Vote on Acceptable Level of Health-Based

Dear Texas Commission on Environmental Quality,

The combined effects of chemical exposures matter to our health. I ask that TCEQ strengthen the Sun recommendation to adopt a 1 in 1,000,000 health-based risk levels for air permits. It is critical to the h our communities that the TCEQ accounts for potential exposures of multiple chemicals when assessing permits. Texans rely on TCEQ to uphold its mission, which in part *strives to protect our state's public hea* Please uphold this mission by strengthening air permitting standards to account for the combined hea

Re: Sunset Management Recommendation 1.2: Commission Vote on Acceptable Level of Health-Based

Dear Texas Commission on Environmental Quality,

The combined effects of chemical exposures matter to our health. I ask that TCEQ strengthen the Sun recommendation to adopt a 1 in 1,000,000 health-based risk levels for air permits. It is critical to the h our communities that the TCEQ accounts for potential exposures of multiple chemicals when assessing permits. Texans rely on TCEQ to uphold its mission, which in part *strives to protect our state's public hea* Please uphold this mission by strengthening air permitting standards to account for the combined hea

Re: Sunset Management Recommendation 1.2: Commission Vote on Acceptable Level of Health-Based

Dear Texas Commission on Environmental Quality,

The combined effects of chemical exposures matter to our health. I ask that TCEQ strengthen the Sun recommendation to adopt a 1 in 1,000,000 health-based risk levels for air permits. It is critical to the h our communities that the TCEQ accounts for potential exposures of multiple chemicals when assessing permits. Texans rely on TCEQ to uphold its mission, which in part *strives to protect our state's public hea* Please uphold this mission by strengthening air permitting standards to account for the combined hea

Dear Texas Commission on Environmental Quality,

The combined effects of chemical exposures matter to our health. I ask that TCEQ strengthen the Sun recommendation to adopt a 1 in 1,000,000 health-based risk levels for air permits. It is critical to the h our communities that the TCEQ accounts for potential exposures of multiple chemicals when assessing permits. Texans rely on TCEQ to uphold its mission, which in part *strives to protect our state's public hea* Please uphold this mission by strengthening air permitting standards to account for the combined hea

Thank you,
