

# Table 2: Changes to Human Health Toxic Criteria

---

Below are changes being considered to Table 2 of §307.6(d)(1) of the Texas Surface Water Quality Standards (TSWQS). These criteria are updated every revision cycle based on current scientific information and the issuance of new or updated EPA human health criteria documents. All values are in **µg/L**:

## Updates to Existing Entries

### *Carcinogens*

| <b>Chemical</b>           | <b>Adjusted Input</b>                                    | <b>2022 Water + Fish</b> | <b>2026 Water + Fish</b> | <b>2022 Fish Only</b> | <b>2026 Fish Only</b> |
|---------------------------|--|--------------------------|--------------------------|-----------------------|-----------------------|
| N-Nitroso-di-n-Butylamine | Oral Slope Factor (mg/kg/day) adjusted from 5.43 to 5.40 | 0.119                    | 0.120                    | 4.2                   | 4.18                  |

### *Noncarcinogens*

No changes are currently under consideration to any existing entries for noncarcinogenic compounds.
