Five TMDLs for Indicator Bacteria in Four Austin Streams**

Tracking Number	Date Received	Affiliation of Commenter	Summary of Request or Comment	Summary of TCEQ Action, or Explanation
001	8/7/2014	Concerned Citizen	The commenter noted that Turkey Creek, 1403M_01, is downstream of a popular off leash dog park in the Emma Long Metropolitan Park, and upstream of a popular swimming area in Lake Austin. The commenter requested that TCEQ monitor it for indicator bacteria.	TCEQ wishes to thank the commenter, and will refer this matter to the City of Austin, which is responsible for monitoring. Since this stream is not in any of the TMDL watersheds, no changes have been made to the TMDL based on this comment.
