

**NOTICE OF REQUEST FOR PUBLIC COMMENT AND NOTICE OF A PUBLIC MEETING
ON FIVE DRAFT TOTAL MAXIMUM DAILY LOADS FOR INDICATOR BACTERIA IN
THE MUSTANG, PERSIMMON, AND NEW BAYOUS WATERSHED**

**AVISO DE SOLICITUD DE COMENTARIOS PÚBLICOS Y AVISO DE REUNIÓN PÚBLICA
SOBRE CINCO BORRADORES DE CARGAS DIARIAS MÁXIMAS TOTALES PARA
MICROORGANISMOS INDICADORES EN LAS CUENCAS MUSTANG, PERSIMMON, Y
NEW BAYOU**

The Texas Commission on Environmental Quality (TCEQ) has made available for public comment five draft Total Maximum Daily Loads (TMDLs) for indicator bacteria in the Mustang, Persimmon, and New Bayous watershed, of the Bays and Estuaries Basin in Brazoria and Fort Bend counties. The purpose of the meeting is to provide the public an opportunity to comment on the draft TMDLs in five assessment units: Mustang Bayou 2432A_01, 2432A_02, and 2432A_03; Persimmon Bayou 2432D_01; and New Bayou 2432E_01.

A TMDL is a detailed water quality assessment that provides the scientific foundation to allocate pollutant loads in a certain body of water in order to restore and maintain designated uses. The commission requests comments on each of the major components of the TMDL: problem definition, endpoint identification, source analysis, linkage analysis, margin of safety, pollutant load allocation, seasonal variation, public participation, and implementation and reasonable assurance.

After the public comment period, TCEQ may revise the draft TMDLs if appropriate. The final TMDLs will then be considered by the Commission for adoption. Upon adoption, the final TMDLs and a response to all comments received will be made available on TCEQ's website. The TMDLs will then be submitted to the United States Environmental Protection Agency (EPA) Region 6 office for final action. Upon approval by EPA, the TMDLs will be certified as an update to the State of Texas Water Quality Management Plan.

Public Meeting and Testimony. The public meeting for the draft TMDLs will be held at the Alvin Public Library, 105 S Gordon St, Alvin, TX 77511, on March 5, 2025, at 6:00 p.m.

Please periodically check the project webpage before the meeting date for meeting related updates: <https://www.tceq.texas.gov/waterquality/tmdl/nav/114-mustangbayou>.

During this meeting, individuals will have the opportunity to present oral statements. An agency staff member will give a brief presentation at the start of the meeting and will be available to answer questions before and after all oral statements have been received.

Written Comments. Please choose one of the methods provided to submit your written comments. Written comments on the draft TMDLs may be submitted to Jackson Malone, Water Quality Planning Division, Texas Commission on Environmental Quality, MC 203, P.O. Box 13087, Austin, Texas, 78711-3087 or eFaxed to 512-239-1414.

Electronic comments may be submitted to <https://tceq.commentinput.com/>. File size restrictions may apply to comments submitted via the TCEQ Public Comments system. All written comments must be received at TCEQ by midnight on March 18, 2025, and should reference *Five Total Maximum Daily Loads for Indicator Bacteria in the Mustang, Persimmon, and New Bayous Watershed*.

For further information regarding the draft TMDLs, please contact Jackson Malone at Jackson.Malone@tceq.texas.gov. The draft TMDL document can be obtained via TCEQ's website at <https://www.tceq.texas.gov/waterquality/tmdl/nav/114-mustangbayou>.

Persons with disabilities who have special communication or other accommodation needs who are planning to participate in the meeting should contact Jackson Malone at Jackson.Malone@tceq.texas.gov. Requests should be made as far in advance as possible. **Para la versión en español de este documento, visite** <https://www.tceq.texas.gov/waterquality/tmdl/nav/114-mustangbayou>.
