

Working Together for Clean Water

Stakeholders and the TCEQ Total Maximum Daily Load Program

Because...
we Texans
love our
water

For things like...

Including... **FUN!**

Not to mention...

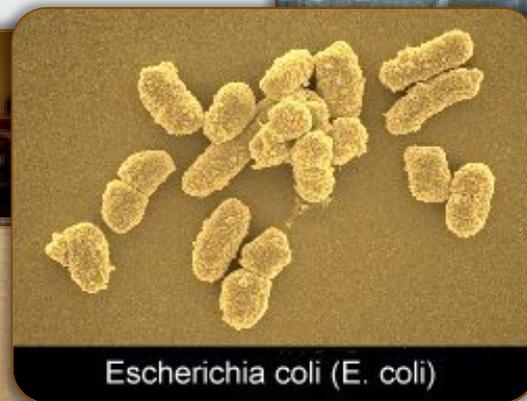

BUT...

Some of our water is not as good as we would like

So the Law requires us to ask...

- What are the problems?
- How bad are they?
- How can they be corrected?

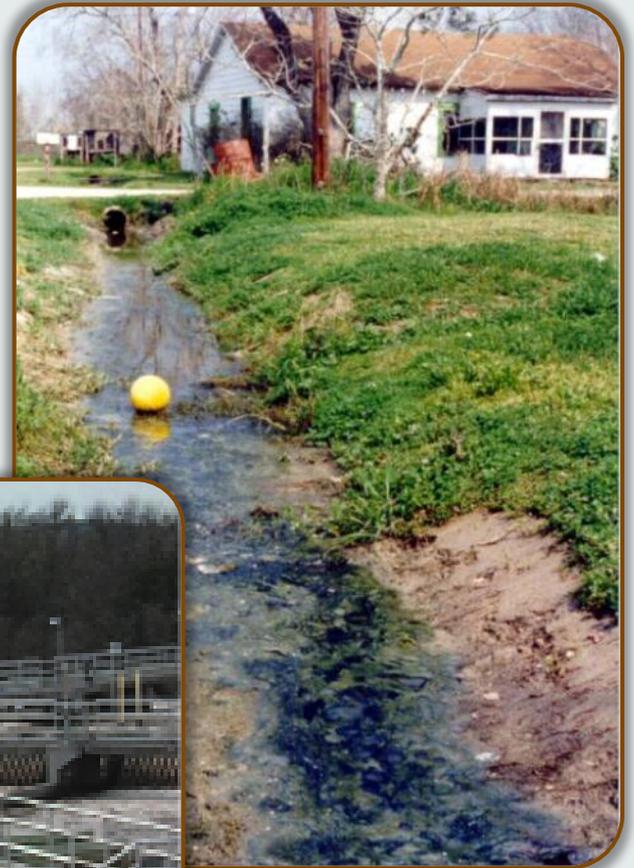

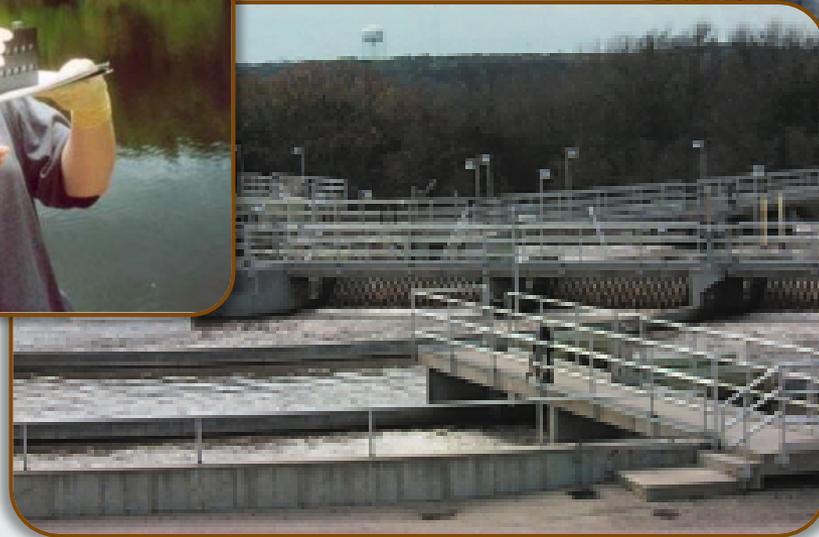

TMDL: Total Maximum Daily Load

- How much is too much?

Detective Work

- How bad is the problem?
- Where is it coming from?

**We Work
Together
on the Fix**

Implementation Plan

- Developed by YOU, the stakeholders

The I-Plan outlines a solution

- What we found out from the TMDL
- What we can do about it

The Community decides

- We believe in the wisdom and strength of the community to address its own problems

We work the plan out together

- Many solutions are voluntary
- Implemented over time
- Progress is measured

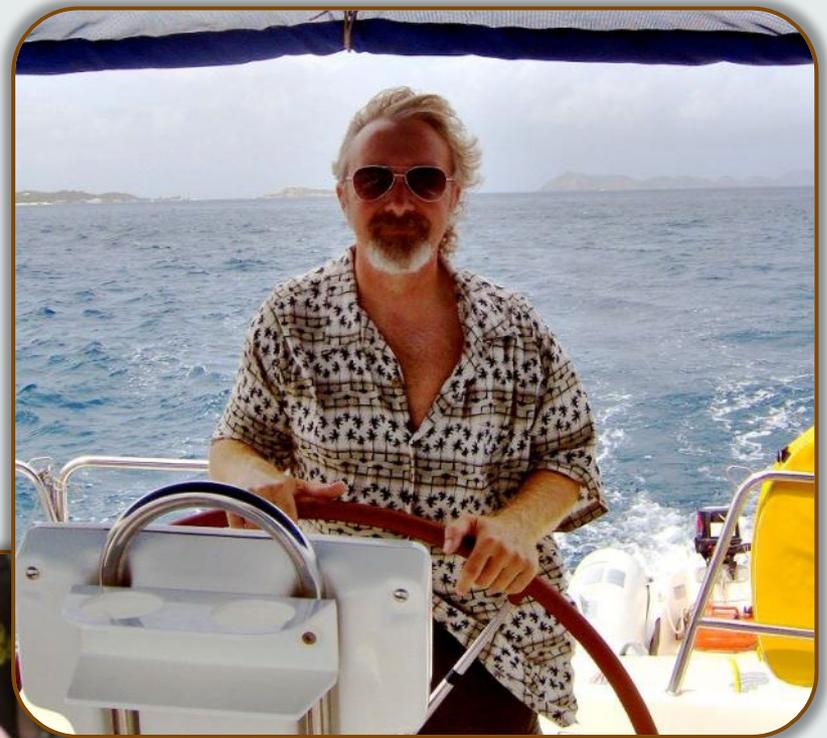

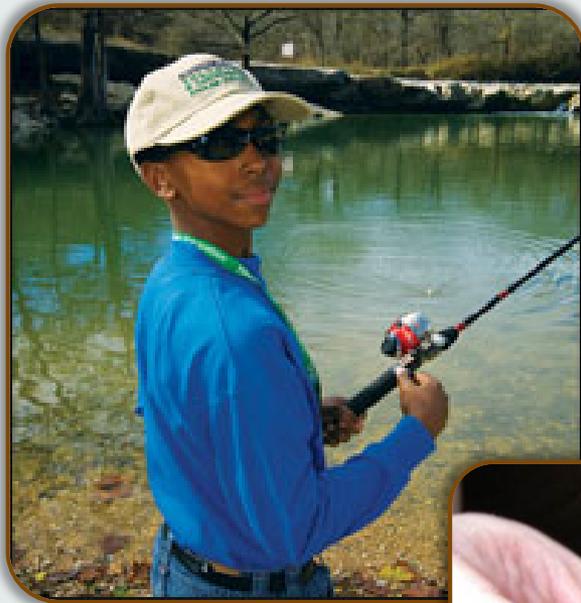

I-Plans are Adaptive

**Why do we
do this?**

A few good reasons

And just a few more

What are yours?

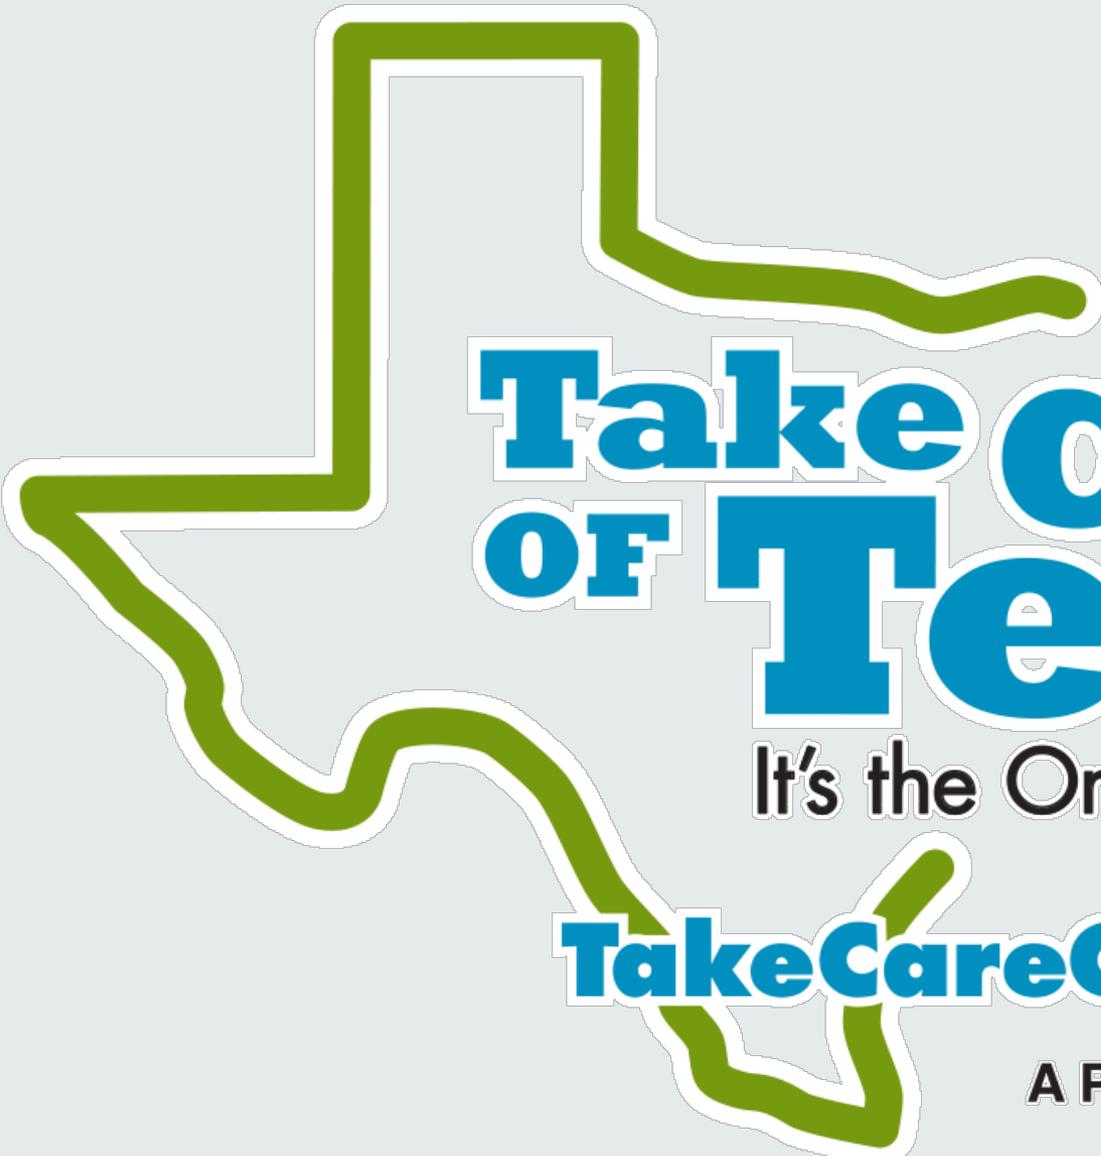

We're with you!
